

# Graduate Research Assistantship

Michigan State University

## Environmental and Ecological Modeling

**Graduate assistantship** is available to a highly motivated student to work on a NSF or USDA funded project. Projects focus on method development for spatiotemporal analysis of large ecological inventory databases. Candidates must have a desire to pursue an emphasis in environmental data modeling, statistical computing, and demonstrate competency in computer programming (e.g., R, C/C++, or Fortran).

Compensation package includes:

- RA funding available for 2 years, starting Fall 2009 semester
- Enrollment through the Department of Forestry or Geography
- Possible specialization in Statistics and Probability

If you are interested please provide:

- Statement of interest and career goals
- GRE scores
- Undergraduate and graduate transcripts
- Curriculum vita
