Like the picture above represents a typical Minnesota scene, we of the Peavey Staff hope this publication will similarly represent The Minnesota School of Forestry and its alumni.
Throughout his nearly 30 years of service, Clarence Prout has made significant contributions to forestry in Minnesota. His experience in nearly every phase of State Forest Service work and his outstanding personal qualifications led to his appointment as Director of the Division of Forestry in the State Department of Conservation in 1948. He is representative of the Minnesota Forest Service. Executive ability, willingness to delegate authority to men under him, good relations with men in the field, and ability to work with legislators and conservation organizations, have marked his administration. Recognition of these and other abilities has come in his recent elevation to Deputy Commission of Conservation. The Gopher Peavey is proud to add recognition of Mr. Prout's contributions to Minnesota forestry by dedicating this 1954 issue to him.

REPORT ON THE SCHOOL OF FORESTRY

F. H. Kaufert, Director

The pleasant task of preparing this report for the Gopher Peavey—Alumni News should actually fall to Dr. Schneider, who is doing such an excellent job of running the School this year, but as is usually the case the more onerous jobs are left to Art and the more interesting and pleasant ones fall to my lot.

The past year has been a very busy one for the staff of the School of Forestry. The historical material leading up to the celebration of our 50th Anniversary was presented in last year's Gopher Peavey—Alumni News. The celebration of this occasion and the various activities involved are described in this issue. Consequently, the 50th Anniversary celebration will not be dealt with in much detail in this report. The fact that more than 600 attended the banquet on Friday, October 23, 1953, indicates that the School of Forestry's 50th anniversary celebration was of considerable interest to alumni and friends of the School. The closest estimate that we have been able to make indicates that about 300 alumni of the School returned to help us celebrate this occasion. Present in the group at the banquet were many representatives from other University departments, representatives from other U. S. forestry schools, many legislators, and other friends of the University and School. The 50th anniversary celebration was an occasion that will be long remembered and it is one that we can look back on with real pride. As Director of the School, I appreciate that this celebration would have been impossible or would not have been the success it was had it not been for the tremendous amount of work done by staff members. The many contributions made to the success of this occasion by our teaching staff and hard-working office force deserve special acknowledgment.

Staff

One new addition to the staff during the past year is Mr. Ronald I. Beazley in the field of forest economics. Mr. Beazley has a B.S. from the University of New Brunswick, Canada, has an M.F. from the Yale School of Forestry, and will receive his Ph.D. from Purdue in the near future. He is handling our work in the field of forest economics and valuation. A second new staff member is Mr. Edward T. Sullivan. Ed came with us on January 1, 1954, to assist in the handling of some of our management work while Otis Hall devotes additional time to the completion of his Ph.D. thesis. In line with our practice of employing individuals from industry to assist in connection with instruction on certain applied courses, we last fall employed Mr. Larry Clark, Youngblood Lumber Company and Mr. William Gitts, Lumber Service Bureau, to handle the instructional work in our Building Merchandising and Construction course. Paul St. Amant of the U. S. Forest Service who has handled our field instruction in aerial photography for seniors at the Cloquet Experimental Forest for the past several years, will again be with us this spring. The same is true for Mr. Phinney Larson, owner and operator of the Home Plan Book Company, who will again handle our course in Building Cost Estimating, Blueprint Reading and Drafting.

Changes in the teaching staff are important but from the standpoint of the actual functioning of the School, changes in the office staff can often be of equal significance. Miss Lois Wieseke who is now in charge of the office, Alice Becker who came with us on June 1, 1953, and Ruth Dalby who has been with us on a part-time basis for several years, make up our office force. I continually marvel at the accomplishments of our office force and we all recognize that as our staff increases in size, we will need to add additional office staff to take care of the greatly increased volume of work.

Research

The School is continuing its gradual expansion of its research activities. As mentioned last year, the publication of our Minnesota Forestry Notes series has been very effective in stimulating our research and bringing information of our findings to interested individuals. A listing of Minnesota Forestry Notes 1 to 15 was given last year. The research notes published during the current year are:

17. Preliminary Field Evaluations of Endrin and Dieldrin for Control of the Larch Sawfly—J. W. Butcher.
23. Farm Income from Sales of Cut Forest Products as Compared to Sales of Stumpage—Richard A. Skok and Otis F. Hall.

During the past year we have reviewed with the Lake States Forest Experiment Station the overall research needs in Minnesota. A mimeographed publication on this survey will be available in the near future. This survey indicates that although all fields of forestry research are in need of additional attention, that possibly the best coverage at present is in the fields of forest management and silviculture. As a result of this survey our future plans for expansion are in the following fields: wood utilization and technology; farm forestry, shelterbelts, and influences; forest tree genetics and tree physiology; forest soils; forest pro-
A new development in our research program during the last year was the initiation of contract research with the Office of Iron Ranges Resources and Rehabilitation. The two research projects undertaken on a contract research basis with this group deal with brush invasion and control studies and with the effect of forest tent caterpillar defoliation on growth and mortality of aspen.

Undergraduate and Graduate Enrollment

Our undergraduate enrollment is the smallest it has been since World War II. Our enrollment at present is about 150 in all curricula and all four years. This is too small a group of undergraduates students and we are attempting this year to stimulate enrollment, particularly in such curricula as Building Products Merchandising and Light Construction where the demand for graduates has been very great. However, additional enrollment is necessary in all curricula because employment opportunities for graduates have never been better and the demand for graduates far exceeds the number available.

Our graduate enrollment is also down somewhat from a year ago, but we do have a particularly strong group of graduate students working on research problems. Those enrolled for graduate work are listed in another part of this issue.

Short Courses

We again are operating the short course for retail lumber dealers and 47 students are presently enrolled for the one-month short course which is given in cooperation with the Independent Retail Lumber Dealers’ Association, the Northwestern Lumbermen’s Association, and the Twin Cities Hoo-Hoo Club. Our staff for this course as in the past includes between 30 and 40 industry leaders of the Twin Cities and surrounding territory.

It is planned to offer a short course in hardwood lumber grading sometime this spring and summer. Also we plan to look into the possibility of additional short courses in the fields of forest management, aerial photography, and possibly cooperate with other interested groups in the State in offering the saw-mill short course which was so popular earlier.

School of Forestry Service Fund

As indicated in another part of this issue of the Gopher Peavey—Alumni News, a local lumber company which has been very friendly and cooperative with the School of Forestry gave us during the past year a sum of money which has been set up through the Greater University Fund as a special item to be used for the promotion of Forestry School projects. This fund, known as the School of Forestry Service Fund, is thus available for designation by alumni contributing to the University of Minnesota Greater University Fund. It is hoped that this School of Forestry Service Fund can be built through contributions to the Greater University Fund to a significant item in the School’s budget picture.

In connection with my travels on the Society of American Foresters’ Forestry Research Project, on which I will be active full time until July 1, 1954, I hope to be able to see many of the School’s alumni. In my recent trip to the West Coast I did see many of you but missed others. Wherever I go I find that Minnesota Forestry School alumni are doing outstanding jobs and are highly regarded by industry and public forestry leaders and by their associates who are graduates of other schools. Everyone interested in the Minnesota School of Forestry can be justly proud of the fine records being made by our alumni. I know that almost daily in my travels I encounter new examples of the accomplishments of our alumni in all fields of forestry and forest products. If it is not possible for me to bring you personal greetings from the School during my travels in the next few months, please accept our greetings expressed through this column which this year is rather hastily prepared but which I hope will help give you some idea of the progress being made by the School in its overall development.

FORESTRY SCHOOL SERVICE FUND ESTABLISHED

The establishment in the School of Forestry during 1953 of a School of Forestry Service Fund through a small gift by a local lumber company marks a significant step in the School’s program. We have needed a fund of this type that would be free for use in research, for purchase of needed items of equipment, and for occasional but essential faculty travel to out-of-state professional and scientific meetings. This fund will supplement financial assistance received from both public and private sources in the carrying out of the School’s responsibilities.

It is appreciated that the present fund is small and that it will not provide for many needs of the type that cannot be financed by regular appropriations. However, the establishment of this School of Forestry Service Fund as a designated item in the Greater University Fund program is very significant. It provides an item for School use in the Greater University Fund to which alumni and others contributing to the Greater University Fund can direct their contributions. The School of Forestry hopes that alumni and others contributing to the Greater University Fund will designate that their contributions be directed to this item, rather than to other or undesignated Greater University Fund budgets.

FORESTRY CLUB
LIGNUM CLUB
WOOD UTILIZATION
XI SIGMA PI
FORESTRY CLUB, 1953-54

By Dave King, President

The Club, like a burlesque queen, has traveled a bumpy road this year. A drop in school enrollment was, in part, the cause of a very decided drop in Club membership. The roll dropped from the 86 members of last year to 44 this year. However, the membership was fairly loyal and showed up well for the meetings. Much the same activities were indulged in this year as in past years.

Last spring the Canoe Trip took place with Stillwater as the base camp. Bill Cushman did an able job and we didn’t see the faculty until we were on our return trip. Stillwater did not live up to its name on that particular Sunday. A high wind came up in the late afternoon and had a 3 mile sweep straight up the river. All of the motley crew managed to come through alive though a little wet, a little wiser and a little worse for wear.

As usual, the Club added another Blarney Stone to its Irish Rock Garden. The annual battle took place at the corner of 15th Ave. and Washington. In addition to the Blarney Float, three floats were more or less demolished, and one antique flintlock pistol was requisitioned. The law students and the miners tried to get into the act this year. As the parade passed the School of Law the embryo lawyers, showing absolutely no coth, opened fire with tomatoes, refuse and general garbage. For some reason or other this initial act of violence seemed to incense the aforementioned engineers. By the time they reached the scene of the main battle they were quite unruly. The battle plan was one of encirclement with the KSTP TV Combat Cameraman directing the tactical situation. His enthusiasm rubbed off on the troops causing them to continue the good fight after the main objective had been taken and secured. The troops were finally brought under control in time to prevent the complete demolition of Coffman Union. A strategic withdrawal was made to Ag Campus. In a short while the wires were hot between camps. St. Patrick had been subjected to an unsuccessful kidnapping attempt and had been rather unceremoniously bounced out of the rear of a moving panel truck. And, as might be expected, the Foresters were being blamed. A truce was called and a conference held. The blame for the incident was placed on the doorstep of the miners and the engineers quietly went back to their slide rules with a persecution complex and feeling that the foresters were the only ones they could trust.

Later in the spring the foresters were faced with Kitchi Geshig; i.e., All-College Weekend. Dick Trochill was in charge of Open House and did a good job for a very small attendance. Mark Luedke was in charge of the Forestry Events which were rained out and had to be held in the Livestock Pavilion. Wes Suhr took charge of the Friday noon meal which was quite well attended. The float committee came through with what might be considered either a new low or a new high in float design and construction.

This fall we had an entry in the Homecoming Parade that looked like a float. The committee, headed by Paul Wagner, requisitioned a buggy and went on from there. The Club also entered the Woodpiling Contest and won second place. Competing against a semi with two 4-wheeled car trailers isn’t all it’s cracked up to be.

Thanksgiving vacation was spent cutting Christmas trees near Cottage under the direction of Jerry Angier. The crew was able to get in only one day’s cutting on Dana Worrell’s land. But, luckily, someone brought a deck of cards. The profits from the project amounted to approximately $100.

Forester’s Day, January 30, was headed up by Mike Kerrick and he did a very good job. We tried something new this year by having the dance off campus at the Midway Civic Club. It was less expensive and the atmosphere was more informal than that at the Big Barn in Coffman. The annual award of “The Big Black Bottle” was instituted this year with full SAB approval. This award is to be presented each year to the student who takes part in the most contests, wins prizes in the most contests and comes in the most appropriate attire. Gene Tavonatti was the recipient this year. The award is a large Vat 69 display bottle.

Another new idea is brewing which we hope will materialize. Michigan State has suggested the idea of having a spring outing for the Midwest Forestry Clubs. The schools included would be Minnesota, Michigan State, Michigan, Purdue and Iowa State. Each school would take its turn as host for the shindig.

Although all of the activities of the Club may not have been howling successes, we had fun doing them and many of us learned something from them. A thank you to the officers who, to the best of their ability, tried to direct the activities of the Club: Ralph Johnson, Vice-President; Herb Rhoades, Secretary; Lyle McCutchen, Treasurer; Dick Trochill, Publicity; Ken Anderson, Program; Jim Bell, Sergeant-at-Arms; and Otis F. Hall, Faculty-Adviser.
There are certain features of the three Wood Utilization curricula that distinguish them from other fields of training. At the present time the most marked of these distinguishing features is opportunity. That is to say, a Lumber Merchandising or Wood Technology graduate has little trouble in finding a job when he leaves school. Furthermore, the graduate has much immediate chance for advancement. If he has drive and initiative the sky is the limit.

Minnesota Wood Utilization graduates are in a variety of jobs in all sections of the country. This is due in part to the fact that few colleges offer the type of training one can receive at Minnesota. Our staff of instructors are among the best and the courses they teach cover a wide range of interest in the technical forestry field. In Lumber Merchandising students are prepared for work in industrial or retail wood products sales, lumber-yard management, light construction, and home designing and planning. The Wood Technology course offers a similar range of training except that the graduate is oriented more towards research and the application of the technical aspects of wood.

Very few students enroll in the Wood Utilization curricula. At the present time over 70% of the students in the technical curricula are students who have either transferred from general forestry, other colleges at this University, or from other universities. What does this mean? It means that the Wood Utilization field has many fertile yet latent possibilities, possibilities that are not apparent to most high school graduates or even to many college freshmen and sophomores. These are the possibilities that are realized by mature minds charged with the desire to go somewhere, to be someone.

The enrollment in these curricula here at Minnesota is small in number, yet there is a feeling both among faculty and students that it is not quantity but quality that counts and these same persons are prepared to match their school, their training, and themselves against that of any comparable group anywhere.
The Lignum Club is an organization for students interested in Wood Utilization. It performs many business and social functions throughout the school year in addition to holding bi-monthly meetings. Our programs this year, planned and arranged by Irv Cornwell, have been many and varied. Men of industry such as Mel Haugen of U. S. Plywood, Prince Bokovoy, an F.H.A. housing inspector, Roy E. Olson, a housing contractor, Don Hobarth of the Lumber Service Bureau and Al Fridlund, an architect, have all contributed their experience and advice to our members.

We planned for this to be an outstanding year for the Lignum Club and it has thus been unique in many respects. Glen Koepke received the annual Hoo-Hoo club scholarship last May. Also last spring, under the leadership of Don Butler, we built a walnut trophy case that now stands in the student room and houses the Forester's many trophies. Starting with a bang last fall ('53) we broke away from a heavy party schedule long enough to serve coffee and cookies for the Forestry School's Fiftieth Anniversary and plant one-hundred red pines (Minnesota's state tree) at Sheltering Arms Hospital.

Our homecoming float was not particularly outstanding, being dreamed up by Cornwell, Vandercar, and Freeman on their return from a Forest Products Research Society convention in Duluth. Latest reports were to the effect that the homecoming queens, who were so unfortunate as to have to ride in an open convertible directly behind our "float," are still picking toilet paper out of their hair.

Our basketball team, the first in Lignum Club history, has had success of a similar nature. While it is not felt by the players that training on beer at Mannings has any detrimental effect on their condition, Ozzie Cowles is known to differ. In any event we are happy to report that the Lignum Club team, sparked by Pat Merickel, who out-scored the whole Forester's team himself, was able to beat the Forester's team by a score of 46 to 19. We hope that this develops into an annual event.

At the present time the Lignum Club is engaged in building a display case that will advertise the Forestry School. Through the showing of this case around the state, it is hoped that more students will enroll and graduate in Forestry, especially in the technical curricula.

Our members still attend as many Hoo-Hoo Club (the fraternal order of Lumbermen) meetings as possible. In that respect it may be of interest to some of our veterans to learn that "Sunny" Dare no longer performs her exotic dance at Vic's but has moved across the street to the Frolics. We hope there is room in the front row.

As mentioned previously, our party schedule this year has been somewhat heavy, thanks to Rolf Wunder, our social chairman. Latest stock market returns show that the Country Club Malt Liquor Company stocks are still rising due to increased sales in the Twin Cities district. Another rumor has it that anyone caught rolling pool balls down a bowling alley automatically qualifies for our chug-a-lug team. While it is still a little early to make any rash predictions, it is reported that Sgt. Ray Gomez, U.S.A.F., is the popular choice for the award going to the person who has done the most for the Lignum Club this past year. Our parties have been many and varied, from dances to wiener roasts to tobogganing. We sincerely hope that those who have not been able to attend thus far may contribute by their presence in the future.
1st Row, left to right: Architect Fridlund at a meeting; “Dig that Crazy Float”. 2nd Row: Coffee and donuts after a meeting; Lignum Club vs. the Foresters. 3rd Row: Jones and Wunder, the tree planters; Chef Cornwell pours another. 4th Row: Working on our display board; Indoor tobogganing with beer.
XI SIGMA PI

NATIONAL HONORARY FORESTRY FRATERNITY

The object of Xi Sigma Pi is to secure a high standard of scholarship in forest education, to work for the upbuilding of the profession of Forestry, and to promote fraternal relations among earnest workers engaged in forest activities.

CHRISTMAS TREE PROJECT
PLANTING
50th ANNIVERSARY
CANOE TRIP
FORESTER'S DAY
ITASCA
CLOQUET
CHRISTMAS TREE PROJECT

By Jerry Angier

The Christmas Tree Project started this year with two strikes already against it; a saturated market and extremely warm weather. This year seemed to mark the high point in the cycle of retail Christmas tree lots, and the lack of snow promised a lot of wet going in the spruce swamps.

The advance crew arrived in Cloquet late Thursday, and the newcomers were guided to some of the places of interest in the vicinity by several veterans of the Spring Session. By closing time another carload had arrived at the station, and several card games were soon started.

The early birds routed out the sackrats long before dawn and the whole crew stumbled into town for chow. This pleasant task lasted until the cafe ran out of hotcake batter. The sun was just breaking through the smoke from N. W. Paper Company, and we figured it was time we located Dana Worrall, our guide to the new cutting site. We had apparently run afoul of the International Date Line, however, because Dana wasn’t expecting us until the next day. He was tied up in a conference in Duluth and couldn’t possibly leave before 5:00 P.M. This announcement was greeted with mixed feelings; we wanted to cut while the good weather lasted, but here was a whole day to stay in the cabins and play cards.

Two of us met Dana in the late afternoon and drove up to see the new stumpage. It is located several miles closer to Cotton than the old place, and has some very good spruce and balsam material. We followed the same routine Saturday morning, but this time we started for Cotton immediately after eating.

The warm weather and the lack of deep snow made cutting much easier than it has been in the past. We were able to cut 400 trees in one day because of the good conditions. Part of the crew stayed over until Sunday morning to bundle the trees and load the truck. The trees were delivered late that night and the field work was completed.

The actual selling of the trees followed a different pattern this year. After the orders had been delivered, the old problem of keeping the lot open during the evening had to be solved. As a last resort, the lot was put on a self-service basis with remarkably good results. This system seems to be the ideal solution to the problem of selling trees after class hours and during vacation. The profits from the project will run under the income of past years, but the fifteen men working on the project gained a good deal of practical experience in the planning, cutting and marketing of a forest product.

SPRING PLANTING

By Ralph Johnson

One windy day last spring fifteen hearty Foresters, under the able leadership of Dean Reed, embarked on the dusty prairies of the Rosemount Station with 3500 unsuspecting seedlings of undetermined denominations. Upon arriving at the prelocated “forty” we found much to our glee that some pre-planting measures had been taken, as the area had been burned over. This, combined with the stiff breeze, made ideal working conditions, but with the aid of Dr. Duncan and Mr. Hall, the seedlings were planted in record time. It was estimated that it would take the thirty men who had signed up at least all day to complete the job, but the fifteen that showed up dispatched the job in less time and were rewarded by the extra rations intended for the larger group. The work was hard but we all had fun and the compensation to the club was worth the time.
The School's 50th anniversary is now history. Judging from the attendance and enthusiasm, this was an outstanding occasion. Numerous comments from guests, alumni, friends and University administrative officers, indicated that the School's celebration was one of the finest affairs of its type ever held at the University.

It really began early in July, when the six surviving members of the School of Forestry class of 1910 (originally consisting of nine members) gathered for a week-long reunion in Minnesota. They started from the home of Charles L. Lewis at Shell Lake, Wisconsin. The group, accompanied by their wives and Professor Emeritus J. H. Allison traveled along the Lake Superior North Shore, stopped at the Cloquet Experimental Forest, and at the Itasca Forestry and Biological Station while it was in session, ending their tour at Green Hall in St. Paul. The six were Arnold O. Benson of Missoula, Robert Deering of San Francisco, Norman Jacobson of Tacoma, Herman Krauch of Tucson, Charles L. Lewis of Shell Lake, and Clarence Underwood of Yakima.

Friday morning, October 23, even before the registration desk opened for business at 9:00, alumni filtered into Green Hall. Before the afternoon program commenced, over 200 had registered. Included were the entire class of 1906, Bill Cox, Sam Detwiler, Frank Rockwell and Dillon Tierney. Alumni came from as far away as Alaska, Oregon, Washington, Arkansas and North Carolina. Alice Stuart ('33) of Fairbanks, Alaska, and James Gillis ('11) from Tacoma, Washington, probably traveled farthest to attend.

Opportunity was provided for all alumni to review their years in School via photographs, the Peavey, and other momentos of earlier years. In the Student Room, many old photos of Itasca, Cloquet, Xi Sigma Pi, the Forestry Club and other places or organizations were displayed. Under some old class photos, spaces were provided for identification most of which were filled by the end of the day. Blarney Stones were exhibited in quantity. Itasca plaques and monuments were also on display. A roving photographer snapped former students at various "bull sessions" during the morning.

Just before noon, Henry and Mrs. Schmitz, now residents of the president's home at the University of Washington, appeared. A session at the party dining room in the Cafeteria where an Informal luncheon was held, turned out to be a friendly affair. Many alumni not formerly acquainted had the opportunity to be brought up-to-date on the current work of former classmates.

The afternoon meetings consisted of a forestry program for School graduates and other foresters and simultaneously a special program for their ladies. The subject of the forestry meeting in Green Hall Auditorium under the chairmanship of Dr. A. E. Schneider was "Forestry in Minnesota—Past, Present and Future." Brief welcome messages by Dean Macy and Director Kaufert introduced the program. Then M. B. Dickerman, Director of the Lake States Forest Experiment Station, reviewed the history of Federal Forestry in Minnesota. Clarence Prout, Director of the State Division of Forestry; Bernard Granum, Forestry Supervisor of the Iron Range Resources and Rehabilitation Commission; and George Amidon, Forester for the Minnesota and Ontario Paper Company, presented papers on State Forestry, County Forestry, and Private Forestry respectively.

The ladies' meeting started with a trip through the very modern new wing of the Home Economics Building. "Wood in Home Design and Decoration" was the general subject covered in the subsequent program. Malcolm Lein of the St. Paul Gallery and School Design; Collis Hardenbergh, Minneapolis architect; and John Rood, a well-known wood sculptor; discussed the particular aspects of the subject having major interest to them.

The principal event of the celebration was the Friday evening banquet in the Coffman Union main ballroom which was attended by some 560 people with an additional 40 in the balcony for the program. With the assistance of the University Public Relations office, it was planned to the Nth degree. The small Norway pine seedlings at each place on the table gave the appearance of a young pine plantation. Colored slides of mature Norway pine at Itasca and Cloquet were projected on the walls at either end of the speakers' table. These not only brought the forest to the banquet but also displayed Minnesota's recently selected state tree. Appropriate recorded music was provided in the background. Steaks or fresh pike were served promptly at 6:30.

Frank Kaufert as toastmaster introduced the guests at the head table including members of the Board of Regents and the University Administration, members of the Forestry and University Committees of the State Legislature, early graduates, those to receive special University recognition, and others. A fine set of slides portraying the history of the School and accompanied by Dr. Kaufert's commentary was of primary interest to alumni. George Drake, President of the Society of American Foresters, brought the group the good wishes and congratulations of the Society.

President Morrill spoke briefly of the accomplishments of the forestry profession generally. He then introduced the "five distinguished alumni . . . of our own School of Forestry, typifying the 20th century forest, each of whom has won high achievement in his chosen field." These included A. Dale Chapman, '29; William T. Cox, '06; Samuel B. Detwiler, '06; Samuel A. Graham, '14; and Charles L. Lewis, '10. At some length, President Morrill then spoke of the accomplishments of Henry Schmitz, President of the University of Washington, while at Minnesota. The award of "Builder of the Name" conferred by President Morrill upon Dr. Schmitz is an honor reserved for those "whose lives and work have merited special recognition for unique contribution to the ongoing and upbuilding of the University." Previously, it had been awarded only four times.

In his address, Schmitz spoke of the University of Minnesota as a land grant college "dedicated to the basic principle of educational opportunity for all. It is ever striving to fulfill Jefferson's conception of a university as an institution in which every branch of knowledge useful to its day is taught in its highest degree. It is a University that recognizes service to the state and research as basic obligations." He also referred warmly to various members of the University's Administration, who since 1925, had made very real contributions to the success of the School of Forestry, to the older members of the staff in Forestry, and to the accomplishments of the School's graduates.

On Saturday morning, a group of some 50 alumni gathered at Lake Vadnais under the guidance of J. H. Allison for the field trip over the approximately 275 acres of plantations. This provided an opportunity for many to

50th ANNIVERSARY (Continued from page 25)

become reacquainted with the plantations on St. Paul Water Department lands. Many of these plantations now over 35 years of age have reached the thinning stage of management. Favorable weather added to the enjoyment of the trip.

A suitable “finis” to the celebration was provided by the Minnesota-Michigan game in Memorial Stadium Saturday afternoon. Between halves, the Minnesota band featured the School's anniversary by forming a pine tree on the field accompanied by suitable commentary over the loudspeaker and playing “they cut down the old pine tree.” It also featured the 50th anniversary of the Little Brown Jug battles which began as Professor Green was establishing a Forestry School on the St. Paul Campus. Minnesota soundly defeated their ancient rivals from Ann Arbor—score 22-0—a fitting climax to the celebration.

CANOE TRIP

By Bill Cushman

The canoe trip was held Sunday, May 10th, at Stillwater. A party of ten canoes started out from Muller's docks and headed up the St. Croix in beautiful weather. Mike Kerrick and Carl Mehlhenberg brought their own canoe and it was rumored that a built-in beer cooler had been installed. With all the provisions intact, a landing was made about three miles up river on the east bank.

The climb up the hill was as much work as paddling to the spot. Here we had our lunch and lounged around, some enjoying their favorite parlor games in an outdoor atmosphere. Al Nelson and Ray Carson, after eating their lunch, took their girls and went on kind of a field trip; we never did find out if it was mensuration or dendro, they were studying. Anyhow measurements and species were probably the top objectives. In the meantime their lemonade jug had been tapped.

Marvin (cold blood) Reinke and some others of the crew took an early summer dip in the river. It was pretty cold but enjoyable.

On the way back Dave King and Ralph Johnson had the right idea, seeing their dates needed experience in canoeing, they “stubbornly” gave up their paddles. However, about half way back a terrific windstorm came up and the going was really tough. Bob Arkins and Gordy Kimball had their canoe swamp, and a camera and other equipment was lost. The faculty canoe had to wait out the rough waves on shore. Ginger Sorenson was taken to the hospital, but everything worked out. All in all, it was a pretty exciting trip.

FORESTER'S DAY

By Mike Kerrick

Forester's Day began as usual this year by taking a mid-winter cruise of the "main side" coeds. Because of prior commitments, we could not secure Mr. Bunyan's (most foresters know him by the name, Paul) Blue Ox named Babe.

The object of rivalry between the engineers and Foresters this year was one of their prized Blarney stones, of which we have many. The Blarney stone we took over was actually a frozen chunk of mud—a fitting monument to all engineers. The battle over the simulated "stone" was hot and furious. We finally let the engineers have our "stone" and at last reports it is now residing in a freezer in the dark dungeons of main Engineering.

Early arrivals at Green Hall on Saturday morning found numerous E's splashed around (childish engineer's retaliation after finding "stone" was mud). A clean-up committee was formed and everything was put back into shape for the events that took place in the afternoon.

The Bean Feed started the day rolling at eleven o'clock. A large crowd was on hand and were fed beans until they came out their ears. The faculty, true to form, piled the plates high with beans, ham and other assorted gunk.

Next on the program was the GREEN HALL PLAYERS in their stupendous no holds barred, spare no expense production of the "Naming of Cut Foot Sue." This was a very dramatic tear-jerker where the heroine, Sue, spreads her sweet innocence over the lives of many a hardened logger in the North Star Saloon.

The Lignum Club handled all the exhibits in Green Hall. They had quite an impressive display, covering most phases of Forestry all the way from growing and harvesting of the timber to manufacturing and merchandising of the finished product.

All day Paul had stood out front in the fifteen degree weather guarding the throne and the events field. Now came his time for glory—as we crowned Diane Albrightson as our Daughter of Paul and her attendants Pat Johnston and Marian Fairbanks. Merle Meyer was crowned Uncle of Paul and Dave King as son of Paul.

John Kaiser and Ray Carson tied for longest beard with a total length of 1.9". Both were rewarded with a kiss from the queen. Geno Tavenotti had the best form; Ed Sheppard came through with the most Scroungiest; Dave King had the most unusual beard and Dick Warring had the most peach fuzz.

A trip to the barber shop, torturous for many, followed in preparation for the Stump Jumpers Ball that night. It was a little embarrassing for many who forgot what the bearded wonders looked like when clean shaven. A rousing good time was had by all at the Midway Civic Club as they danced to the "music" of Jim Flom and his Outhouse Five. As the evening progressed a few of the more paunchy individuals slipped downstairs to sample the hospitality of Ye Olde Grogge Shoppe, and most stumbled back before they were missed.

By now things have almost returned to normal. All those who participated in the making of this Forester's Day should be given a big vote of thanks and especially the committee chairmen who put a lot of their time and effort into making this day a success. A list of these committee chairmen were:

Publicity Dave Myhre, Lyle McCutchen
Program Jerry Angier, Wes Lathrop
Dance Mark Luedtke

**CANOE TRIP**

By Bill Cushman

The canoe trip was held Sunday, May 10th, at Stillwater. A party of ten canoes started out from Muller’s docks and headed up the St. Croix in beautiful weather. Mike Kerrick and Carl Mechlenberg brought their own canoe and it was rumored that a built-in beer cooler had been installed. With all the provisions intact, a landing was made about three miles up river on the east bank.

The climb up the hill was as much work as paddling to the spot. Here we had our lunch and lounged around, some enjoying their favorite parlor games in an outdoor atmosphere. Al Nelson and Ray Carson, after eating their lunch, took their girls and went on kind of a field trip; we never did find out if it was mensuration or dendro, they were studying. Anyhow measurements and species were probably the top objectives. In the meantime their lemonade jug had been tapped.

Marvin (cold blood) Reinke and some others of the crew took an early summer dip in the river. It was pretty cold but enjoyable.

On the way back Dave King and Ralph Johnson had the right idea, seeing their dates needed experience in canoeing, they “stubbornly” gave up their paddles. However, about half way back a terrific wind storm came up and the going was really tough. Bob Arkins and Gordy Kimball had their canoe swamp, and a camera and other equipment was lost. The faculty canoe had to wait out the rough waves on shore. Ginger Sorenson was taken to the hospital, but everything worked out. All in all, it was a pretty exciting trip.
Mense at Itasca introduced us to the practical application of forest measurements, cruising, chaining, running compass lines, and scientific balance charts which meant procedure plus. The high lite of the course was running a diagonal through a section of land by use of compass and pacing method. Although no one got lost (and its a good thing because tourist trade at Itasca would have really decreased!) everyone got good and muddy. Our goal was to find a stake and see how close to this stake we could come and of course map tree types etc., along the way. Sure enough, after what seemed like thousands of swamps we came upon Dick Stokes nonchalantly smoking his pipe and laughing at us as we came dripping out of the swamps.

Field Ecology under Dr. Hanson had two projects—that of taking reproduction count and light intensity study. The latter was especially interesting, also a report from Roy Lake and the mapping of the La Salle Trail was a part of this course.

I think just about all of us doff our hats to Doc Rees. He took us places I thought weren’t navigatable! It was his duty to find us some 180 odd different species of plants and trees which he ably did (although I still think 179 of them we could find in back of our cabin).

In bird and bugs we keyed out various insects for our collections and tried vainly to hear whether that bird was saying ‘hic free beer’ or just free beer. It really never mattered which was warbled as the guys started a rush in that direction every time hoping it wasn’t a bird on the other end. Of course to catch bugs it was essential to have a bug-mobile and this was supplied by Jerry Jensen. (Jensen supplied more than that though.)

But also—not all was study, in fact little of it was. The park did offer quite a few places of relaxation.

Also we had log burling contests. I guess the champion was Bill Cushman who stayed on for a full second once. Two Itasca Bowl football games were played and of course you can’t forget the daily excursions to the swimming beach with Commander Murphy. Two gangs, “The Phantoms” and “Greenies” were active on and about the park. Usually one of the two groups was blamed for almost everything and usually it was some outsider.

We were also very fortunate in having had a reunion of the 1910 class with us. They were really a grand bunch of guys and the Forestry Department is justly proud of such men.
Some of the more pessimistic members of the '53 corporation were beginning to think that spring would never come, but, as is its habit, it did, and with it came that long awaited session at Cloquet. As it turned out it was well worth waiting for.

The elections during the winter had produced a very able body of officers with Lance Hamilton as President, John McGown as Treasurer and Gordy Kimble as Steward. The list on the bulletin board showed 34 names all split up into crews of two and four. As seems to be the way of some of the boys(?) there were about a dozen married members, several of whom couldn't think of any good excuses to leave the wives at home so they brought them along. Big Lake had its usual contingent with Rosdahl, Nelson, Hahn and Chardon. John McGown started out all right but got hitched in April and moved into Duluth, which probably sets a record for commuting distance to Cloquet.

We started the opening day with a very practical course in aerial photography, ably taught by Paul St. Amant (Minn. '31). That is, most of us started. Dick Tousley arrived two days late, naturally. This course managed to get us to see practically all of the station in a short time with the result that we became well acquainted with the area right off the bat.

There was plenty of snow and it was wet most of the time. This created a situation which trained everyone, including instructors, in the fine art of dodging (usually) flying objects. The field trips sometimes threatened to turn into utter routs and some of the better planned battles were known to last from suppertime until 10:30 at night. No one stepped out of a cabin without first looking to both sides and then running to the next nearest shelter.

The two weeks spent on timber stand improvement were something of a record in that we became well acquainted with the area right off the bat.

We picked jack pine cones and extracted seed from them in the sweat box called a seed house. Everyone spent a half day at the sawmill to learn a few of the fundamentals and foul up the crew as much as possible. We made time studies and determined under and over run.

We had a lot of planting experience under various conditions. We planted by machine in brush and then in an open field for the Christmas tree plantation. Hand planting in a cut over area and transplanting in the nursery rounded us out in that part of the work.

Special mention should be given to Gene "Big Stoop" Romanski (Minn. '50). It was he who cracked the big whip and kept tabs on us. He even carried this so far as to check up on those who occasionally patronized Archies. If you've never seen 250 pounds of Romanski do the "Bunny hop" you just haven't lived. It's really rare. There's a story going around that he once lost a whole crew in the woods and spent considerable time looking before finding them just where he left them. Wonder what happened?

Several field trips were taken and enjoyed by all. There were trips to the Willow River nursery, Cass Lake, North-west Paper, Diamond Match, Wood Conversion, and Superior National Forest. The Superior trip was a twoday affair that was well worth the effort. We visited the Tomahawk pulping operations and stayed overnight at their camp. The chow was out of this world. At Ely the Forest Service staged a practice drop of supplies by parachute and also gave us a tour of the station and seaplane base.

Sports played an important part in the recreation program. Softball was the rage for most of the quarter. We managed to scrounge enough material to build a new backstop, which should see considerable service before it needs replacing. An effort was made to arrange a game with one of the town teams but we didn't have any success.

Sports also took quite a toll of ankles. Al Haff broke his ankle in a touch football game. About a week later Randy Skeie's ankle was broken in a close play at third base. We took him to the hospital and the rest of the boys decided to play a nice quiet game like volleyball. A short time after we got Randy to the doctor another car pulled in with Russ Hanson. It seems that volleyball can be dangerous, too. Russ' ankle was only sprained, but it was bad enough to slow him down for a few days.

Every Friday afternoon about 4:00 the roar of motors was heard as the usual large contingent of cities-bound bush apes piled into cars and hit the trail for home. If the boys are to be believed they must have nailed their gas pedals to the floor and left them there until they got home, 'cause they sure claimed some fantastic trip times. Two and a half hours was about par for the course.

When the quarter came to a close it was decided to help defray some of Skeie's expenses by giving him the commissary profits. This, however, didn't stop the usual end-of-the-quarter party at Limbers' and from all reports it was a dilly.

Mrs. Wappas was the cook again this year and did a wonderful job. Due to her good work and Gordy Kimble's fine managing we all received a very welcome refund. Thanks are due to all the officers and instructors for a very successful quarter at our favorite "classroom," Cloquet.
They'll miss us and send out a rescue party by next week, I think.

There you go, talking about breaking up the game, what's the matter, don't you like Euchre?
GRADUATE STUDENT NEWS

By Allen L. Lundgren

Egolfs V. Bakuzis, research assistant, is working on his Ph.D. thesis and preparing for his preliminary examinations. He is majoring in forestry and minoring in soils. In 1935 he received his Forest Engineer degree from the University of Latvia. He has also studied at Hamburg University. From 1932 until 1950 he was engaged in practical forestry research and teaching. At the present time Egolfs is studying the influence of balsam fir understory on pine reproduction.

Roger R. Bay expects to complete his M.F. degree, with a major in forestry and minors in statistics and soils, next June. Roger came here from the University of Idaho last summer. He has been working under the M and O Research Scholarship in Forest Management on regeneration of the spruce-balsam-hardwoods type and also on logging damage in this type.

Bruce A. Brown received his M.F. degree in 1953 and is now working on his Ph.D. program, majoring in forestry with a minor in soils. He is studying brush invasion of pine types of Minnesota under an Iron Range Resources and Rehabilitation contract. Bruce is also an instructor, teaching Farm Forestry in the Ag School and General Forestry to the foresters.

Otis F. Hall has managed to keep busy working on his Ph.D. thesis, "Economics of Thinnings," which he hopes to finish soon. He is majoring in forestry and minoring in economics. At the present time he is working on a forest land assessment procedure for Minnesota under a graduate school grant. Otis is teaching Conservation, Forest Management, Forest Policy, and Research Methods.

Allen L. Lundgren entered school this fall and is now working on his M.F. degree. After receiving his B.S. degree from Minnesota in 1951 he spent two years with the U.S. Forest Service in the southwest. He is majoring in forestry and minoring in economics.

Merle P. Meyer is studying for his Ph.D. degree with a major in forestry and a minor in soils and geology. He received his M.F. degree in Range Management in 1950 from the University of California. Merle has just completed a project for the office of naval research involving testing and analysis of the photo interpretation qualities of various types and seasons of aerial photography of northern Minnesota forests. He is teaching Forest Aerial Photogrammetry and Range Management.

James C. Oberg began working on his M.S. degree last fall with a major in wood technology and a minor in mathematics. Jim received his B.S. from Minnesota in 1953. He is studying the swelling of wood as his major project.

Elwood B. Shade entered the University of Minnesota this winter to begin work on his Ph.D. degree. He is a graduate of Pennsylvania State University where he received his M.F. degree in 1946. From 1946 until 1954 he was employed by the U.S. Forest Service in general administrative work.

Richard A. Skok will be getting his M.F. degree the end of winter quarter. He intends to continue in school working for a Ph.D. degree with a major in forestry and a minor in economics. Dick has been working with Otis Hall on his forest taxation assessment study.

Walter B. Wallin received his M.S. degree last year and is now working towards his Ph.D. degree majoring in wood technology and minor in industrial engineering. Walt is also teaching Forest Products, Lumber Merchandising and Grading, Wood Utilization, and Wood Preservation. As his thesis problem he is investigating wetwood in coniferous species.

REVIEW OF 1954 J. F. EXAMS

By R. M. Brown

Minnesota graduates, generally in the upper bracket with respect to the number of students passing the J. F. exam, again ranks very near the top based on the results of the 1954 exams. Eighty-seven percent of the foresters who took the exam this year passed as compared to the seventy-four percent who passed in 1953.

Using the percentage of students in the eighty to eighty-five percent grade grouping as a criterion, Minnesota students and graduates also showed improvement over the preceding year. There were almost twice as many at this level in 1954 as there were in 1953.

It is sincerely hoped that this trend will continue.
MIKE KERRICK, '54
Chief of Party Mapping Crew
U. S. Forest Service
Willamette National Forest, Oregon

For the third summer in a row I made the long journey from the land of the sky blue to the land of Douglas fir and mountains.

Don Hanson, Jerry Koenigs and I left Minnesota around the middle of June for our destinations in Oregon. I was the only "West Side" man of the three so naturally I had to take quite a bit of harsh treatment along the way. We arrived at Bend, Oregon, about three days after we left Minnesota.

Don dropped Jerry and I off at Bend. I continued on foot toward the famed McKenzie Pass. I thought the pass would be open, but to my disappointment, it was closed temporarily because of high water on the road. Oh well! I had nothing to lose (it was only a thirty mile walk) so I tried "hitching" and I'll be darned if a newly-wedded couple didn't pick me up. What a trip!

Because of fund trouble I started the summer out as a road maintenance man (official rock picker for the grader), but after the first of July I began my duties as chief of party of the mapping crew. We started work in some of the toughest country I had ever seen and ever hope to see. After three or four weeks of struggling up and down slopes of 40-60 percent covered with dense brush, we finally got moved to what we delightfully termed the "Quartz Creek Camp for Tired Mappers." What a change! In one jump we moved out of single Douglas fir that was just barely merchantable into triple Prime Douglas fir that was really a dream to work in. Pretty level terrain, it averaged a rise of about 250 feet in a mile and hardly any brush. I could write pages extolling the virtues of this beautiful stand, but because of space, I'm limited to this cursory description.

After mapping the area we started laying out clear cut units, and finally cruised these. This took up most of the summer.

We enjoyed one of the best fire seasons in many a year; I only got on three fires all summer. Although the summer was somewhat uneventful, it was a real treat to spend one summer in Oregon when it didn't feel like you were sitting on top of a powder keg waiting for it to go off. I hope to spend many more like it.

One recommendation I can make to any fellow planning on spending a summer in western Oregon is to buy a good pair of caulked boots. They are darn expensive but you'll need 'em. Also one should build up those leg muscles—Minnesota was never like this.

The Cascades of Western Oregon and Washington is a tremendous chunk of country and I certainly hope I can make my way back there again sometime to stay.

VIRGIL BENDIX, '56
Smoke Chaser
Nezperce National Forest, Idaho

On the 12th of June, Bob Schramek and I turned the "Blue Monster" so fondly called an automobile toward the west, and after three very rough days and several quarts of oil, we reached our destination—Idaho. After dropping Bob off at the Clearwater National Forest, I proceeded south to the Nezperce National Forest where I was to be gainfully employed for the next three months.

After I had reported to Marlin Galbraith in Grangeville, Idaho, and had received my hard hat, I was put to work piling slash with a caterpillar tractor. The Nezperce forest has a reputation of being able to burn when nothing else will and this summer was no exception. From the middle of July until September 12, when I left for home, we had a full time job of fighting fire. Most of these fires were in very inaccessible places, and back in the mountains, hiking ten to twenty miles to a fire was not uncommon.

All in all it was a very interesting summer, during which time I obtained much knowledge of the use of heavy equipment in the woods and also many of the techniques used in fire fighting.
RON FROELICH, '54
Great Mountain National Forest
Norfolk, Connecticut

Tom Mielke, two forestry students from Michigan State and yours truly spent our summer on the Great Mountain forest of Norfolk, Connecticut. The ten sections which comprise the forest are covered with Northern Hardwoods and Eastern Hemlock. The most impressive part of the area is a virgin hemlock stand; but Douglas fir, Red Pine, and Norway Spruce plantations run a close second.

Shortly after the turn of the century, most of the land had been clearcut to provide wood for the charcoal industry. Charcoal was used in the smelting of the iron ore, but after the Minnesota iron mines were established, Connecticut iron and charcoal ceased to be of importance. Interestingly enough, remnants of the old charcoal pits can still be found in the forest.

The Great Mountain Forest is owned by E. C. "Ted" Childs, a M.S. from Yale University. In addition to maintaining a staff of two permanent foresters, Darrell Russ and Sam Hawley, Ted has provided forestry students with an excellent opportunity to gain practical forestry knowledge. A great advantage of our summer job was its considerable variety. Among the forestry jobs included were transplanting white cedar seedlings, chemical girdling with sodium arsenite and nursery maintenance. Three weeks were spent releasing pine in planted and naturally reseeded areas. Terminating our summer activities, three weeks were spent in timber cruising.

Three tours, which covered a total of approximately 3000 miles, provided us with a vivid picture of the northeast and east central timber types. Special points of interest were the White Mountains, the Green Mountains and Cooperstown, New York, famous for the Baseball Hall of Fame. We also visited the Howard Forest, the Penobscot Experimental Forest, a veneer mill, and a forest co-operative saw mill. We attended two sectional meetings of the Society of American Foresters. Heated discussions on many controversial forestry ideas, along with tours of forests and experimental areas helped to make the meetings very worthwhile.

It was with great reluctance that we left the land of the rising sun. Swimming at Toby Pond, the grand town folk of Norfolk and the Great Mountain Forest, along with the tours of the Northeast will always be remembered. It was an enjoyable summer, one that was well spent.

BOB SCHRAMEK, '54
Engineering Aide—Survey
Pierce Ranger District
Clearwater National Forest, Idaho

When August was half over, and our road survey crew was still plugging away on an access road project, we figured we wouldn't see any fire fighting this year. The fall rains would start any day now, and besides, with several big timber sales coming up along this road, the district ranger would rather take women and children first before pulling out his survey crew. But one evening at supper, a dog-tired J.F. came trotting down the 7-mile trail that led over the ridge from the nearest road, and told us to pack our fire gear to go on standby—all the brush crews were on fires and we were the only men left on the district. Sure enough, 4 days later, we were on an 800 acre fire, 120 miles away, (100 miles by logging road, and 20 miles by trail). I spent an interesting, though not completely enjoyable week on the fire before returning to surveying.

Most of the summer, our survey crew worked out of pack camps on all phases of road survey for several projects, in the district. The Clearwater forest is in the heart of Idaho's White Pine, and trees from 60" up to 84" dbh and 10 logs were not uncommon. Most cutting was in White Pine, and in Western Red Cedar, for shingles, split posts, and poles. Stands of virgin cedar, along the creek flats we camped on, ran from 4' up to 12' dbh and averaged 4 logs.

My job varied from cutting stobs (brush stakes), and brushing and blazing line, to running compass, chaining, setting stakes and keeping notes, running abney on cross sections and elevations, locating and tying in section corners, and cruising timber along right-of-way, and also some office work figuring coordinates and cross sections.

Some of the useful things I learned during the summer included: What cross country short cuts not to take, the relative toxicity of yellow-jackets, bald-faced wasps, pissants, mosquitoes, black flies, and no-see-ums, how to kill porcupines, and not to volunteer for water buck on a big fire.

Insomuch as they broke the monotony of life in a pack camp, we were indebted to the local fauna population of deer, elk, moose, bear, wildcat, cougar, porcupine, mice and ground squirrel, especially their nocturnal raids. Also
to the yellow-jacket and wasp nests that kept us on our toes in the woods, the card games, the hungry and delicious trout, and the cook with the bad back whom we had to carry out, I give thanks for making the summer an experience that was anything but dull.

Seriously, the summer was well spent, and I gained invaluable experience in surveying and forestry. I would definitely recommend such a job for summer experience.

DONALD MARKSTROM, 55
Minnesota State Forest Service

After finishing the Itasca Summer School Session, I worked for the State Forest Service at Koochiching County. The Forest Service was conducting, for future management plans, a one percent survey of the Black Bay area. The entire area which the survey encompassed was about 210,000 acres.

The method employed to obtain the survey data was to use aerial photographs which furnished the acreage of each type and to take sample plots in each type. From this data, volumes were estimated. Other information such as reproduction and disease conditions were also gathered.

The predominant forest type in the area was spruce, balsam and aspen. Once in a great while some old Reds and Whites were encountered. In some localities there were many partially decayed stumps of Red and White pines which indicated some of the previous forest types.

When I joined the estimating crew, the headquarters were located at a Minnesota-Ontario Paper Company logging site. The camp was a six mile boat trip on Rainy Lake from the Black Bay Ranger Station. Considering the remoteness of the camp, the living conditions were good. The cook shack had a gas refrigerator and a gas stove. That gas refrigerator kept our food and beverage supply in good condition. The day's work started by eating breakfast, and after breakfast the crews loaded the boats and canoes and proceeded to the day's cruising area. The boat trip generally took about an hour.

During my spare time I fished, swam and shot pistol. The evenings were usually spent playing cards.

RALPH JOHNSON
Ant Flat Ranger Station
Kootenai National Forest, Montana
Timber Mgt. Aid

Back to the old Kootenai for another summer. Guess those old mountains are getting in my blood. The summer of '52 I spent as a scaler in a lonely little cabin fourteen miles up in the mountains. Last summer to my surprise that lonely little cabin had become the office of a thirty man camp of surveyors, brush crews, timber markers and laborers. A cookhouse, washhouse, and bunk house were in the process of being built and we had to live in tents, but I thanked God I didn't have to eat my own cooking.

My biggest surprise came when they jacked me up to a GS-5 and made me boss of that camp. To top it off I was put in charge of a four man marking crew. As may be expected I had troubles, but to my relief I was relieved as camp boss by a JF at the end of a week. A short time later I got six smoke jumpers to help step up the timber marking program. It seemed as though we marked every bug infested spruce in the Whitefish Mountains, but every time we turned around there was a logger screaming for more timber. Even though the Devils Club and steep slopes were fighting us all the way, we kept up a steady pace until the fire season began and our marking crew was reduced to two. We were then joined by a new JF and there were more bosses than cooks.

About that time a new logging operation began and since I had a previous summer at scaling, I was chosen. This was the first time I had scaled on a landing so I had a few difficulties, but these were soon ironed out and I was scaling 50-75 thousand board feet per day with ease and stayed the rest of the summer.

Again I had an enjoyable summer and a useful one. The schooling I had before I went helped me on the job and the experience I gained on the job has helped me time and again in my last year in school, and will help me in jobs that I may have in the future.

Last summer was one of the most valuable periods in my life, and I learned much from the experience that I gained.
JIM BELL, '54
North Star Timber Company
Camp Avoy, Minnesota

About the middle of last June I said goodbye to the books again with no misgivings and traded my pencil and slide rule for boots and compass. Somehow, I had managed to get a summer job cruising for North Star Timber Company.

After finding their headquarters camp which was called Camp Avoy and is located approximately thirty-five miles north of Two Harbors, Dixon Sandberg gave me a box of small acetates, and a few volume tables, and asked me to compile a forty by forty volume record of all North Star land. Three of us worked on this project off and on all summer before it was completed. After four full days of this, I was seriously wishing to be back in school.

Having never been in the woods before, Dix decided to break me in easy, I guess. As it turned out, it nearly just plain broke me. We were sent out to take survival data on a recent planting. as soon as we got there it started to rain and I spent the next four hours dragging a rope through piles of brush and aspen looking for seedlings.

Their system of cruising was one I hadn't heard of before. It was based primarily on the value of the timber types; that is, a spruce type which is fairly valuable would have a 10% cruise, whereas reproduction or aspen would only get a 5% cruise. All types on a forty were predetermined in the office from aerial photos, a transparent map called an acetate, delineating timber types was made from the photo, and the location of our sample photos were drawn in. We took both the acetate and the photo into the field. With these, we could orient ourselves and make corrections on the acetate if any mis-typing was done. Depending on the accessibility of the area and the value and extent of types, a two man crew could cruise from one to four "fortys" per day.

About half my time was spent in the field and the other half in the office. The office work consisted of tracing type maps constructing a railroad right-of-way map, compiling ours and previous cruise reports and of course, the master tally of "forty" records.

I liked the job very much because of its variability. We would work on one thing a few days and then get switched to something else. Talking about variability, one Sunday afternoon Dix asked me to take a pulp truck up to Grand Marais for their hauling operations, saying that I could get a ride back that same night. I went up there with only a handkerchief and came back a week later. It seems that they were short-handed up there and yours truly was recruited to top load. I've worked on a lot of hard jobs before, but top loading is the most back-breaking of all. We worked 12 hour days with little or no time for a break, and at the end of these days I was thankful to just hit the sack. Towards the end of the week my beard began to itch and my clothes became unbearable, even for me. When I finally got back to Camp Avoy, I did four things. I threw everything except my boots and socks into the furnace, cleaned up, ate a horse or two, and slept for fourteen hours. Next day I was back up there driving truck, but with a change of clothes.

My last two weeks were spent planting seedlings around Cook, Minnesota, with a version of a lowther planter. Although they weren't too successful, North Star is learning a little more every year about how to plant speedily, successfully and economically. Planting is still in the experimental stage and in a few years' time, they should have it down to some kind of system.

All in all, I can say I had a very successful summer. What I learned in school and what I learned at North Star were different. To see practical, business-like application of the former applied and to see how a hundred different ends fit together, giving a clear picture of what goes on, was worth the misery I went through top loading.

RAY E. CARSON, JR., '56
Tally Lake Ranger Station
Flathead National Forest, Montana

During the summer of 1953 I worked on the Flathead National Forest in Montana. Also on the Flathead, but on different ranger districts, were Roger Long and Dick Trochill from school. I was stationed at the Tally Lake Ranger Station which is about thirty miles northwest of Whitefish, Montana. Outside of being on one fire, my whole summer work consisted of running timber sale boundary lines and marking trees. In doing this work I gained much valuable experience with men like John Pike and Pat Taylor who were always willing to take time to explain the "whys and wherefores" of a project we were doing. All in all I had a fine summer working in Montana. There is a lot of big timber out there with big D. B. H.'s and of course that also goes for the girls at Glacier National Park.
It was late afternoon when Don Hanson, Mike Kerrick and I dropped off the high desert country of central Oregon into the cool, green valley along the Deschutes River. We weren’t in town more than ten minutes when I knew that Bend would be just like home; all the men were sporting beards for the July 4th celebration.

The Pringle Falls Experimental Forest, where I spent most of the summer, straddles the Deschutes River about thirty-five miles south of Bend. The bottom half of the Forest is covered with old growth ponderosa and lodgepole pine while the northern part is located in younger stand of ponderosa mixed with white fir.

Much of the summer was spent working with Lew Roth, a forest pathologist from Oregon State College. Lew was studying the distribution of the mistletoe parasite on ponderosa and its importance in limiting reproduction, its effect on the form of the mature tree and its rate of spread. He had devised a system for rating the degree of infection and the damage the disease was doing, so we mapped the location of mistletoe trees by his infection classes. Nothing is known about the distance that mistletoe seeds are disseminated from the host or the rate at which the disease spreads through a stand. To get an answer to these questions we set up groups of cloth traps radiating from both infected mature trees and around stands of infected reproduction. When the seeds were shot from the plant, they stuck to the cloth, thus showing the distance of dissemination, the relative number of seeds and the pattern of dispersal.

During the CCC days several buildings had been built at Pringle Falls and they were all in need of some form of repair. “The Old Master Painter” became my theme song for a couple of weeks; then there was carpentry work to be done, building foundations to be patched, floors that needed refinishing, plumbing to be repaired, and all the other jobs that are connected with maintenance work.

In Forestry IA Mr. Hall gave us the Strong Vocational Interest Test and the results showed that foresters were supposed to be artistically inclined; I never quite knew why until last summer, but the reason became clear when I was painting numbers on trees on the demonstration plots. There were other plots that were re-measured and mapped as time rolled on. Before the summer was finished the foresters at the station and myself had set up a brush control study to determine the most effective chemicals for controlling the Manzanita, Ceanothus and Chinkapin brush that blankets an area when fire has been eliminated or after logging. “Unit area control”—treating each stand as a silvicultural unit—is a new concept out west, even to the research forester; we mapped, cruised and marked “units” (stands) for cutting as the first step in the project. A thinning study in 60-year-old ponderosa was the last major job of the summer.

With the Deschutes River, famous for its trout fishing, flowing through the station, you can imagine how I spent my spare time. The fish weren’t big but they had plenty of fight and were mighty easy on the taste buds. I had heard about the cold mountain streams but didn’t realize just how cool the water was until I had tried a three mile swim downstream. Even though it took five minutes to warm up enough to start shivering, I couldn’t see all that water not being used.

Thanks to my neighbors from a Forest Survey crew and friends I got to see quite a bit of Oregon. One week-end was spent glissading down Eagles Point and hiking at Crater Lake National Park. On another jaunt the Forest Supervisor took me to one of his favorite fishing lakes that was hidden on the summit of the Cascades. A visit to Portland, the City of Roses, a drive down the Columbia River to the Pacific coast and back through the Tillamook Burn country completed a third week-end. The summer’s travel was topped off by a trip into the mountains above Bend.

I knew that a forester should be a jack-of-all-trades but little did I realize that being a hotel manager was one of them. As head clerk of the Pringle Falls “Hotel” I met Leo Issac, “Mr. Doug Fir,” Paul Keen, of Keen’s Tree Classes, Col. W. B. Greely, ex-chief of the USFS, other government foresters from the Washington Office, the regional foresters and most of the staff of the Deschutes National Forest. Talking with these men and range managers, soils men, Indian Service personnel, geneticists,
entomologists, wild lifers, ranchers, editors, loggers and a host of other visitors was an education in itself. Meeting these people highlighted the summer, and along with the variety of work, fishing and traveling made the three months’ stay at Pringle Falls a great experience.

DENNIS WOOD, ‘54
King Salmon, Alaska
Fishing Guide

Most people have probably never heard of the Katmai National Monument but to me it means a lot of things. I hadn’t heard of it either until I met the manager of Northern Consolidated Airlines’ fishing camps and he offered me a job as a fishing guide. Needless to say, I took the job.

The Katmai is the largest National Monument and is located on the Alaska Peninsula. One of its main reasons for existence is the presence of several active volcanoes and the fumeroles in the Valley of 10,000 Smokes. (Now reduced to 4 or 5.) The monument also has an abundance of beautiful scenery, Alaska brown bear, and fish.

Northern Consolidated has two camps in the Monument (one at the famous Brooks River) and three outside of it. I worked at four or five camps. As a fishing guide it was my job to take our high paying guests out on the streams and show them where and how to catch the Rainbow, salmon, machinaw, grayling and dolly varden that were supposedly thicker than the d—no-see-ems. When the fish were biting it was a snap, but did you ever try to make excuses to the same four people for two weeks when the fish just weren’t around? I also had to do everything possible to make them comfortable and keep them well fed. It’s amazing how fussy some people are about what they eat.

When we weren’t busy I had to do just about every job imaginable in the camps. I washed dishes, built tent frames, dug garbage pits, painted, repaired boats and any number of other odd jobs. At one camp we even built a log root cellar. To get the logs I had to go about four miles down the lake to the nearest spruce stand and haul them back in the boat. We dug a little hole 11x13x12 in the side of a hill. No Gold!

Time seemed a little dragged out at times (four months without seeing civilization) but looking back it was a wonderful experience. I met a lot of real fine people and a few “stinkers.” I saw some of the most rugged country in the world and stocked up on enough adventures and stories to keep me going for quite a while. Even managed to make a little money.

If you ever want some real good fishing and you’ve got some money you don’t need, the Kotnaq is the place to go. They’ve got both the fish and the means to relieve you of your money. In the process you might just have a pretty good time.

DICK TROCHILL, ‘56
Lookout
Flathead National Forest, Montana

I took off for Kalispell, Montana, in my ’37 Ford on Friday, June 12th and pulled in about noon on Sunday. About one o’clock, as I was standing around gawking at the females, a familiar face rode by in a car. Behind the face was Ralph Johnson who was accompanied by Dean Reed. We stooed around a while until Ralph took off.

The next day I was assigned to the Condon Ranger Station. After sixty miles of the most impossible road I have ever seen, I arrived at the designated spot to find a couple of characters putting sheets into sleeping bags. When I left, ninety-four days later, they were still putting sheets in sleeping bags. God! What monotony!

I was assigned to timber cruising and “bug survey.” This consisted of walking for three hours, working for two hours, and walking out for three hours. Dean Reed showed up in a couple of days and was also assigned to cruise timber.

After a few days, a group of us was set out in the first of many camps we were to occupy over the summer. These camps were characterized by three things, a babbling brook, bears and porcupines. About July 1, the dispatcher left and Dean accepted the job. Except for excursions to Missoula to the local dance hall and a dude ranch (loaded with unattached women), I cruised timber until the second week in August. By that time the fire danger was getting to where it would be safer for us to be on hand. I had already been on two fires, when on August 10th we had a dry lightning storm. The whole crew had just got back from the local tavern when it struck. I went up into the main tower, all eighty-eight steps, and after recording ten or more strikes, Dean and I went up and just watched the fireworks. After the storm had passed there were so many fires that the mountains looked as if they had Christmas tree lights strung on them. Real pretty.

I spent the next week and a half chasing the afore-mentioned fires.

I then went up on a lookout as the former occupant had stabbed himself in the arm or hand or something. Anyway, he got blood all over the dish towel! I stayed awake long enough to spot one “flare-up” on August 23 and then went into hibernation. I woke up in time to bid Dean good-by when he transferred and then I went back to sleep.

On September 15th I was rudely awakened by the dispatcher on the phone. He informed me that a little old lady in the valley could see a smoke and was I sleeping? I told him that I was on the job, guarding the forest day and night, etc., and as I hadn’t seen a fire, the old lady must obviously be “balmy.” I hung up the phone, turned around, and there it was! Imagine my embarrassment!

When I left for home on September 18th, there were fifty men on the fire and she was still moving. I had some consolation though, as the fire was in the very same spot as the “flare-up” I had turned in on the 23rd of August.

Both my ’37 Ford and I arrived home feeling rather decrepit!
The Colorado Springs Alumni Luncheon

By R. M. Brown

One of the most successful Minnesota Forestry Alumni luncheons to date was held at the Alamo Hotel at noon September 16, 1953. Judging from the spirit shown the fifty alumni, wives, faculty, and guests enjoyed not only the delicious meal but also the fellowship and a chance to reminisce. Thirty-eight alumni from eighteen widely scattered states were present. "Old-timers" from as far back as 1910 and 1920 and grads from almost every year to the present turned out.

Special guests were Mrs. J. L. Deen, Mrs. M. B. Dickerman, Mrs. Galen Pike, and the following wives of alumni: Mrs. M. Brandborg, Mrs. F. Dickinson, Mrs. F. Fredrickson, Mrs. C. Kaufman, Mrs. L. Mueller, Mrs. J. Welliver, Mrs. J. Wishart, and Mrs. R. Wood. Mr. John Young from Rochester, Minnesota, and the two "Old-timers" mentioned above, Norman Jacobson, 1910, of the Tacoma Lumber Company in Washington, and Rudolph Grabow, 1920, of the U. S. Forest Service in Indiana, were also special guests.

Frank Kaufert, as toastmaster, spoke briefly about the present status of the School. Mrs. Deen, Norman Jacobson, and Rudolph Grabow also spoke to the group after everyone had introduced themselves. Otis Hall then summarized the plans for the 50th Anniversary and invited everyone to attend.

The following are alumni that attended:

Other alumni who were at the meeting but could not attend the luncheon were Mr. and Mrs. H. Janelle, W. Mike, and Alice Stuart. Alice flew in by night plane from Alaska arriving the morning of the luncheon but did not quite make it.

The members of the Forestry School staff who attended the luncheon included the following: Frank Kaufert, R. M. Brown, Donald P. Duncan, Otis Hall, Merle Meyer, and A. E. Schneider.

The entire staff is now looking forward to the 1955 reunion luncheon, and hope that you will be present.
Note From Ralph

"Doc" Dawson

"Doc" sends his regards to all. He is retired and is living in Durango, Colorado. He is keeping occupied by making a plant collection, weaving "Navajo" rugs, and adding new birds to his already long ornithological list of identified birds. By the way, the word is that "Doc" can make better Navajo rugs than the Navajos. If any of his former students are in the vicinity of Durango, I'm sure that he would welcome a visit with them. K. E. W.
ALUMNI NEWS SECTION

1899

H. H. CHAPMAN—Professor Emeritus, School of Forestry, Yale University. "Chappie" and his wife celebrated their Golden Wedding anniversary on December 29, 1953. He is continuing his work on the biography of grandfather Herman Haupt, Chief Engineer for the Northern Pacific R. R. during the 1880’s.

1903

MARTIN L. ERICKSON—writes "am more or less a vagabond. Looking after farms in South Dakota in the summer and looking for pleasure and relaxation in California in the winter. In that manner, I manage to keep in fairly good health."

1906

WILLIAM T. COX lives in St. Paul and is a Consulting Forester and Biologist. He reports "satisfactory increase in professional work—satisfactory increase in grandchildren (7 at latest report)—wife and I think that community and social life become more and more pleasant in St. Paul—hunting and fishing call for more time and longer trips than in the good old days."

SAMUEL B. DETWILER spent the Christmas holidays in Boulder Sanatorium due to an uncooperative left eye. The good news is that the eye is much better now. Sam reports "the delightfully mild winter weather this year in Boulder is fine for the health. Look me up when you pass through Colorado. But do not expect to find Boulder Dam here—it’s 500 miles farther west."

FRANK I. ROCKWELL is still going strong as a Consulting Forester and Landscape Architect in Minneapolis.

1909

WALTER M. MOORE—retired on October 31, 1953, after 46 years continuous Federal service (10 years of U. S. Forest Service, 36 years of Air Force duty including military service in both wars). He was given a farewell party by his associates at which 200 persons attended. In November 1953, Walt was recalled to work as a Consultant for the Air Force and served in that capacity until December 31, 1953. Walt and Mrs. Moore will spend February 1954 in Florida and "The first vacation I have had in 20 years." Good luck to you, Walt!

1910

ED. NOTE—The class of 1910 would like to express its appreciation to the Faculty of the School of Forestry for their fine cooperation and hospitality that they were given both at Itasca Park and later during their visit on the Ag. Campus.

ARNOLD O. BENSON passed away November 1, 1953. He had been ill since last April. We extend our deepest sympathies.

ROBT. L. DEERING was retired from the U. S. Forest Service (1-1-49). He writes, "We attended the 1910 class reunion in Wisconsin-Minnesota in July 1953, visiting Lake Itasca campus where faculty and students gave us a royal welcome. Mr. and Mrs. C. L. Lewis, ’10, were our hosts at Shell Lake, Wisconsin, for the first few days and did a marvelous job of 'hosting.' Returned via Banff and Lake Louise which are marvelous. We now plan to fly to Hawaii for two weeks on March 6."

NORMAN JACOBSON—still "keeping forest land busy." He makes a good point with "forestry offers plenty of intriguing problems to argue about and make life busy, interesting, and worthwhile." Thanks for the additional contribution to the Peavey, Norm, it is greatly appreciated.

HERMANN KRAUCH is retired and lives in Tucson, Ariz. He sends best wishes to all and reports "we now have 10 grandchildren—five boys and five girls." Hermann and his wife attended a reunion of his class (1910) last summer and had a nice trip up and back.

CHARLES L. LEWIS, Jr., writes "we have just opened a fine new ski area here called 'Lockhaven' after Ed Locke, the promoter and former instructor at 'Sun Valley.' The U. of M. is coming up 200 strong Snowweek, January 23. Hope to see some of you up here." Charles is Manager of the Midwest Cranberry Co. and many other interests.

CLARENCE UNDERWOOD. Clarence has retired after 30 years as a Refrigerator engineer.

1911

HUGH B. CAMPBELL succeeded R. R. Macartney on January 1 as Manager of the Weyerhaeuser Timber Co., Klamath Falls Branch. Hugh began his forest industry career in the Lake States, moving to the Pacific Northwest in 1914. He had been Asst. Branch Manager of the Weyerhaeuser Tbr. Co., Klamath Falls Branch, since 1938. Congratulations, Hugh!

WALTER L. EISENACH—is an Insurance Adjuster for the Fire and Allied Lines at Duluth, Minn. He states "still doing a little fishing, hunting, and trap shooting. No change in family status. Married 42 years now—wife and self alone. Boys (3) all married and have 8 fine grandchildren."

JAMES R. GILLIS is still retired and responds with "am one year older. See last year’s note."

J. PAUL YOUNG is a Plant Quarantine Inspector and has just recently been transferred to Honolulu, Hawaii. He writes "I will be pleased to hear from any of my classmates." Mail sent to 6913 37th Ave. S.W., Seattle, Wash., will eventually reach Paul.

1912

HARVEY P. BLODGETT states that his present position is "feet on my desk." Otherwise, he is enjoying life the year around in the garden, in the woods, and on occasional motor trip.

GROVER M. CONZET is still retired and occasionally manages to see more of our country via his house trailer.

S. GRANT HARRIS—President of Page and Hill, Inc., Minneapolis, "completed 40 years of very enjoyable experience in producing, preserving, and distributing cedar poles with the valuable assistance of SIGVALD NORMAN, ’12, J. D. BURNS, ’17, and a number of younger men. Looking forward to at least another twenty years."

SIGVALD NORMAN is Western Manager of Page and Hill, Inc., Minneapolis, Minn.

JOHN E. ORR is a Buyer and Salesman for the Edward Hines Lumber Co., Chicago, Ill.

HERMAN N. PETTIBONE is Sales Representative for the Chicago Mill and Lumber Company. This is his 37th year with the Chicago Mill and Lumber Company.

JOHN A. STEVENSON, Head, Mycology and Disease Survey, Horticulture Crops Research Branch, U.S.D.A., writes "in the course of reorganization of the U.S.D.A., Divisions have become Sections, Bureaus have become
Branches, etc.—seven grandchildren, two having been added during the past year."

ROBERT WILSON at present is the Director of Farm Programs—CBS Pacific Network and Radio Station KNX. He reports that he has two daughters, two sons, and two grandchildren. Both daughters are married and both boys are in the Army—one in Korea and the other is stationed at Ford Ord, Calif. Also "spent delightful 2 weeks in July at Itasca Park with sister, brothers, and family—42 years after my summer in Forestry School in 1911—some changes!

1913

E. HOWARD HALL is retired and is living in Eugene, Oregon.

OLIVER SAVRE is retired and is living at Rhinelander, Wisconsin.

THOMAS A. GRIFFIN has been with the Miller Publishing Co. of Minneapolis since 1914. At present, he is Business Manager of this firm. He has been very active in mission and other church activities as well as giving time to various civic functions.

GILBERT WIGGINS writes "Pop" Allison that he is very sorry that he could not attend the reunion of the class of '13 and the 50th Anniversary Celebration. In 1942, Gil married a Miss Elizabeth Hampton and they now have a daughter ten years old. At the end of 1949 he retired as Superintendent of the U. of Kentucky Exp. Forest and moved to Borger, Texas. He has been working as timekeeper and payroll clerk for various contractors who were doing work of the Phillips Petroleum Co. Gil has been bothered with a non-malignant tumor and a stroke which almost completely paralyzed his right side but from which he has mostly recovered. His son, John, is a graduate of the U. of Kentucky in Engineering and is now with the Alaska Road Commission with headquarters at Anchorage, Alaska.

1914

SAMUEL GRAHAM, Professor of Economic Zoology, Forestry Dept. School of Natural Resources, University of Michigan, notes "no material changes since last report."

GEORGE C. LINDEBERG is in the wholesale lumber business at Fairmont, Minn.

STANLEY L. RINGOLD is "still making some shirts. Certainly enjoyed seeing those 'Old Timers' who made it back for the 50th Anniversary."

1918

LELAND L. DEFLON passed away on August 3, 1953. We extend our deepest sympathies.

WALTER H. SWANSON, Vice President in charge of Research and Development for the Kimberly-Clark Corp., Neenah, Wis.

1920

SHIRLEY C. BRAYTON is now District Ranger on Dora Lake Ranger District, Chippewa National Forest.

LEO A. ISAAC was requested by the West German Government to attend a forestry congress of European nations at Stuttgart, Germany, September 7-12. The purpose of the congress was to find ways to increase forest production. Through carefully planned introduction of Northwest tree species in European plantations such production can be increased greatly according to Isaac. Isaac's book "Better Douglas-Fir forests from better seed use" published in 1949 has become the handbook of European foresters using our tree species.

Perhaps all of our feelings are best exemplified by a congratulatory letter from Ernest Kolbe sent to Leo. "This is fine recognition of your forestry accomplishments in the Douglas-fir region. It's particularly gratifying to me that you are getting this recognition which you so richly deserve and which was so slow in coming to you."

PAUL R. PALMER is still Rector of the Grace Episcopal Church at Muskogee, Okla.

1921

PARKER ANDERSON, Extension Forester for the State of Minnesota, is keeping himself busy. In addition to his Extension Forester duties, he is Chairman of the Legion Conservation Committee; Chairman of the Farmer-Sportsman award committee; Director of the Minn. Fire Council; Director of the Minn. Conservation Federation; and a member of the Izaak Walton League Forestry Committee.

FRANCIS V. OSTROWSKI owns and operates "The Crossways Inn" restaurant in St. Paul. His family is "grown-up"—two sons—26 years and 23 years old.

ALBERT E. WACKERMAN, Prof. of Forest Utilization, Duke School of Forestry, Durham, North Carolina.

ARTHUR L. WHITON is Sales Manager for the Chicago Mill and Lumber Co. He was back for the 50th Anniversary Dinner and football game and says "enjoyed both very much."

1922

ALVIN A. ANDERSON is located at Columbus, Ohio, and is Vice-President of the Corrugated Container Co.

OTIS C. McCREERY writes from Pittsburgh, Pennsylvania, where he is Director of Personnel Relations for the Aluminum Co. of America.

RALPH M. NELSON sends a note that he is Chief, Division of Fire Research for the Southeastern Forest Exp. Sta., Asheville, N. C.

BURTON W. THAYER is Manager of the U. S. Plywood Corp., St. Paul Minn., warehouse. The Thayers have two sons—Paul is with the U. S. Geological Survey at Denver, Colorado, and David is at the U. of M. Business School as a post-graduate student.

1923

ORCUTT W. FROST—has been named General Manager of the Forest Fiber Products Co., Forest Grove, Oregon, where he formerly was plant manager. Orcutt will head sales and manufacturing policies of the company. Congratulations, Orcutt!

LOUIS J. LEFFELMAN was just recently transferred from the S.C.S. to the U.S.F.S. He is now Chief, Regional Land Management Division, Land Utilization Program, U.S.F.S. A new grandson just arrived in Germany where one of the three Leffelman daughters is living with her husband, Capt. W. R. Ballow, U.S.A. The Ballows also have three other boys. The youngest Leffelman daughter is visiting the Ballows in Germany. The third daughter, Mary, and her husband, Dr. R. F. Hagerty, have two sons and one daughter and live in Charleston, S. C.

CLARENCE W. SUNDAY is Proprietor of a lumber business at Marshalltown, Iowa.

1924

CHESTER GAY is owner of the Gay Lumber Co. at Moose Lake, Minn. Misfortune struck when the Gay Lumber Co. suffered a $10,000 fire loss. The fire was believed to have been set by sparks from a locomotive. Our sincerest hope that everything will come out okay for Chet.
1926

EUGENE T. ERICKSON writes that he is Manager of the Country Club at Poughkeepsie, N. Y., and also President of the New York Turf Association (1953-54).

JOHN G. KUENZEL, Head, Wood Products Branch, Material Development, Research Division, Bureau of Ships, Navy Dept., Washington, D. C. John's son, Edward, is a freshman at University of Maryland and daughter, Marian, is a junior at Bladensburg, Maryland, H. S. Johnson left in the latter part of January to visit European wood building and laminating activities to observe how marine laminating practices compare with those of the U.S. He will visit London, The Hague, Antwerp, Oslo, Paris, Rome, and Lisbon as well as numerous shipyards engaged in building wooden craft. The "Yale Forest School News," April issue, mentions John as one of the several former Forest Service employees who received recognition. John was presented the Meritine Civilian Service Award Certificate. Congratulations, John!

RALPH M. LINDGREN is still Principal Pathologist with the Forest Products Laboratory. He writes "Next week, ART VERRALL, '27, and I will start a two or three week safari in Panama. It won't be much of a change in climate for Art but a decided one for me right now. Actually, some hard work is in store for us down there."

1927

ROY A. CHAPMAN sends regards from Washington, D. C., where he is Statistician for the Division of Forest Economics, U.S.F.S.

ERNST L. KOLBE, Chief Forester, Western Pine Association. Ernie attended and gave a speech at the National Farm Woodlot Conference held in Chicago on June 25-26. He indicated that in the 12 state Western Pine Region, the woodlot problem is not a great one—only 8% of the 80,000,000 acres of commercial forest land are in woodlots or small forests. Potential woodlot production may not exceed 5% of the region yet we consider it an important factor that deserves support and forestry attention from our Association."

CARL G. KRUEGER writes "not much news to report. My son, Kenneth, is now at the U. of Idaho taking Forestry." Carl is Forest Supervisor on the Cauer d'Aelene National Forest.

EDWARD L. LAWSON, The appointment of E. L. Lawson to the position of the Director of the Division of Forestry for the State of Minnesota was announced this past December. To him we extend our sincerest congratulations and best wishes. Good luck, Eddie!

THOMAS H. LOTTI is at present in charge of the Santee Research Center, Southeastern Forest Experiment Station, St. Paul, Minn. He sends us "what with temperature at -25° F. in Minneapolis, compared with a balmy 60° F. in Charleston, the temptation to rub it in is great. I am truly sorry, however, that circumstances prevented my attending the 50th Anniversary doings. Tom's letter was written before our "Floridian February" weather had settled upon us.

LESLIE W. ORR is Senior Entomologist for the U.S.F.S. at Ogden, Utah. Les states "our Division of Forest Insect Investigation is now a Division in the Branch of Research, Forest Service. The change will not affect my work very much, since most of our time has been spent on National Forests. My son, Wayne, will complete four years' service in the Navy by next September and then plans to go back to school and study forestry."

HARRY E. PATTERSON brings us up to date with "Since leaving forestry school, I have been engaged in the manufacture of paper and insulation products in Illinois, Mississippi, Louisiana, and Minnesota. Have worked in Cloquet for last 18 years doing quality control, personnel, and maintenance supervision. Have wife and two sons (Harry, Jr., graduated from Lawrence College, Appleton, Wis.—is now in Army and Tom is student at Dartmouth)."

MERRILL E. DETERS, Professor of Forest Management, College of Forestry at the University of Idaho. He pens us a note saying "Sabbatical period will begin July 1st, 1954—plan to visit the Lake States and see as many Minnesota foresters as possible." We'll be looking for you, Merrill.

WILLIAM H. FISCHER is Assistant Regional Forester, Timber Mgmt., U.S.F.S. at Atlanta, Georgia.

ERNST J. GEORGE reports that there is no change in the past few years. He is Silviculturist and Superintendent for the U. S. Field Station, Mandan, North Dakota.

FRANK H. KAUFERT, Director, School of Forestry, Institute of Agriculture, U. of Minn. Frank took his Sabbatical leave on November 1st to work on a research project for the S.A.F. He will return to the School of Forestry on July 1, 1954.

DAYTON P. KIRKHAM is still in the Far East. He is Forester for the Korea Civil Assistance Command. He has spent one year in Japan and six years in Korea. Might be Dayton would appreciate some mail from the States.

RAY W. KNUDSEN writes "during the past 2 years I have built a 5 room one-story house and garage. Did practically all of the work except the plumbing and heating. House still not finished but it is real livable and we enjoy it a lot. Am cutting cedar posts on my tree farm now for pin money. Daughter, Donna, is a freshman at U. of Michigan." Ray is Timber Mgmt., Staff Assistant for the U.S.F.S. at Escanaba, Mich.

G. A. (STEVE) LIMSTROM reports his chief outside interests are (1) Annual summer vacation in northern Minnesota, (2) Gardening, (3) Bowling, (4) and at least one Minnesota football game per year. He is Forester (Silviculture) for the U.S.F.S. at Columbus, Ohio.

J. NELI, VAN ALSTINE is District Forest Ranger on the Jefferson National Forest near Castle, Va. Sorry about the spelling of your name, Neil—hope that in the future the error will be corrected.

1929

A. DALE CHAPMAN pens us the following note "what with pushing the penta volume in the wood preservative field, adding some new lines in agricultural and general chemicals, and now with two young boys at home there is never a dull moment around here. Dale is President and General Manager of the Chapman Chemical Co., Memphis, Tenn.

WILLIAM E. HALLIN is Forester, Forest Management Research, Calif. Forest and Range Experiment Station at Berkeley, Calif.

LAWRENCE B. RITTER is doing double duty—he is in charge of the White Pine Blister Rust Control for the U.S.F.S in Minnesota and also is Securities Salesman for the Highland Park Investment Co.

RALPH DANFORD THOMAS is owner of the H. C. Borhus Insurance Agency. Son, Ralph, is at the U. of Minn. and intends to major in physics. Mrs. Thomas and her sister spent two months last summer visiting in Europe.

RAY B. TILDEN is living in St. Paul but operates and owns the Liquid Scale Gauge Co. in Minneapolis.
Greetings from your alumni at

CHAPMAN CHEMICAL COMPANY

Executive Offices and Plant: Memphis, Tennessee

A. DALE CHAPMAN
President
Forestry Class of 1929

C. F. GRAFTON
Vice President, Sales
Forestry Class of 1937

DR. ELDON A. BEHR
Vice President, Research
Forestry Class of 1940

W. F. JOHNSON
Vice President, Production
Chem. Eng. Class of 1940

HOWARD E. OLSON
Sales Representative
Forestry Class of 1947

CHAPMAN Chemicals for forest products

Penta Preservative—for preventing rot and insect attack in wood
Ambrite - Ambrocide—for protecting logs and lumber against stain and insects
Permatox 10-S—for controlling sapstain and mold in freshly cut lumber
1930

CARL E. BENSON is Timber Management Assistant on the Ozark National Forest at Russellville, Ark.

RALPH W. LORENZ, Associate Professor of Forest Research, Dept. of Forestry, University of Illinois. He writes “Last September I started a new home. I did my own contracting—lots of carpentry work and all my own painting and finishing. There’s lots of work to building a home and a few headaches, too. We move in January 29. Drop in some time. Thanks for the invite, Ralph.”

ROLLAND C. LORENZ writes from down Guatemala way where he is Director, Instituto Agropecuario Nacional “La Aurora” with the U.S.D.A.

HAROLD L. MITCHELL is now Chief, Division of Silvicultural Relations, Forest Products Laboratory, Madison, Wis. Harold was transferred last December from the position of Director, Southern Forest Experiment Station, New Orleans, to his present position.

GEORGE T. OLSON, who was former Forest Products Advisor to the Munitions Board, has been appointed Market Consultant to Soderhamn Machine Mfg. Co., Talladega, Ala. (manufacturers of debarking and other sawmill and pulp ing equipment). George will undertake a study of trend of sawmill manufacturing of pulp chips from slabs and edgings.

ARVID TESAKER is a Planner with the S.C.S. at Beulah, Mich. He wrote “Warren Chase of the U. of Mich. dropped in for a chat. See LEITEN NELSON, ’36, occasionally. Tree planting continues to be big work of Soil Conservation districts in Michigan.”

CLARENCE A. WIESE passed away on Dec. 9, 1953. We extend our deepest sympathies.

RICHARD WITTENKAMP is Director and Owner of the Red Pine Camp for Girls at Minocqua, Wis.

CLARENCE D. CHASE. Clarence is in charge of Inventory and Growth Phase, Forest Survey, Lake States.

1931

STANLEY J. BUCKMAN writes, “Still continue with the development, manufacture and sale of various products for different phases of industrial micro-organism control. Bob, our oldest son, finishes high school next year and John, our youngest son, will be a freshman.” Stan is President of the Buckman Laboratories, Inc., at Memphis, Tenn.

MAURICE W. DAY is in charge of the Dunbar Forest Exp. Sta. for Michigan State College. Maurice says “that he enjoyed a visit of Dr. Kaufert this fall. Minnesota foresters always welcome.” Thank you, Maury.

BERNARD J. HUCKENPAHLER is Research Forester at the Tallahatchie Branch, Southern Forest Experiment Station, Oxford, Miss.

HENRY F. KEEHN is a merchant in Lewisville, Minn.

ALF ZAHL NELSON, nationally known as a private forest consultant, has been appointed full-time forest economist for the National Lumber Mfg., Ass’n., Washington, D. C. Alf has served as a part time forest consultant to the National Lumber Mfg. Assn. since February, 1950. Prior to that time, he held a succession of prominent forestry positions with the Interior Department, the National Resources Board, and the U.S.F.S. Our sincerest congratulations and best wishes to you, Alf.

RAYMOND L. OSBORNE is with the Service Bureau with the American Wood Preservers Association and lives in Arlington, Virginia.

PAUL J. ST. AMANT is Asst. Forest Supervisor for the Upper Michigan National Forest. U.S.F.S.

ARTHUR E. SCHNEIDER, Associate Professor, School of Forestry, Institute of Agriculture, Univ. of Minn. Art writes, “Sorry, but can’t think of anything newsworthy.” (Ed. note: Since the last Peavey issue, Art has received his Ph.D. from the U. of Wash.)

DONALD M. STEWART sends us “Received a Ph.D. degree from the Univ. of Minn. last spring (1953). My present work is in the Forest Rust Lab. on the St. Paul campus where physiologic race identifications are made of stem rust collections from all parts of the U.S., Mexico, and many Central and South American countries.” Congratulations on receiving the degree, Don.

BJORN VEHEIM is District Forester at Big Falls, Minn., for the Minn. and Ontario Paper Co. As well as this full time job, Bjorn is also a Justice of the Peace. In uniting a local couple in marriage for Bjorn’s first such duty, he “was as nervous as the bride and groom.” Bjorn, and Assistant Forester STANLY RINGOLD, ’50, last year established a Mando forest tree nursery at Big Falls.

RONALD J. WOOLERY is Minneapolis Traffic Clerk for the Minnesota and Ontario Paper Co. Ron and family (three daughters) left St. Anthony Park in 1952 and moved to a new home in Minneapolis.

1932

HENRY RAY CLINE is living at Virginia, Minn., where he is a Work Unit Conservationist for the Little Fork Soil Conservation Department.

LAURITUS (LARRY) W. KREFTING is continuing his work as Regional Biologist, Branch of Wildlife Research, U.S. Fish and Wildlife Service, Green Hall, St. Paul 1, Minn. Larry had an interesting article on “Effect of simulated snowshoe and deer damage on planted conifers in the Lake States” in the October 1953 issue of The Journal of Wildlife Management. A very good article, Larry.

ROBERT V. ST. AMANT, Bob is Manager of the Tomahawk Timber Co. at Ely, Minn.

WALTER M. ZILLGITT expects to move to Ogden, Utah, from Missoula, Montana, on or about February 15, 1954. He is Chief, Division of Forest Management Research, Intermountain Station.

1933

WILLIAM E. ACKERNECHT reports that “he bought a new home in May and we are glad to leave apartment life behind us.” Bill is Chief, Section of Land Management, Branch of Wildlife Refugees, U. S. Dept. of Interior, Washington, D. C.

HARRY T. CALLINAN is a Soles Representative and is located in Minneapolis, Minnesota. Harry wrote “On a trip to Arizona (January, ’54) stopped at Albuquerque, N. Mexico, and had a nice visit with HAROLD TYSK, ’32. Harold is in charge of Range Management, I believe.”

RALPH H. CHRISTOPHERSON. Ralph is Ranger on the Chippewa National Forest and is living at Marcell, Minnesota. The Christophersons now have three boys—ages 14, 10, and 4.

ROSS W. HAVEN is Manager of the Retail Lumber Co. (Fuller Goodman Co.). A check on news about Ross and family shows “1 wife, 1 boy (12 years), 1 girl (8 years), 1 dog (4), and self.”

GEORGE W. PLANT brings us up to date on his activities with “wife and two children—the girl is a junior in high school and the boy is a freshman in high school. Have been with Honeywell a little over three years after having worked at General Mills Mechanical Division, Minnesota Mining, and the Louis F. Dow Advertising Co. Previous to this industrial work, I spent six and one-half years in technical forestry work in the Civilian Conservation Corps.” George is an Industrial Engineer for the Minneapolis Honeywell Regulator Co.
ADVANCED DESIGN
EQUIPMENT
for today's mechanized logging

Allis-Chalmers modern line of timber handling and earth-moving equipment — all designed and introduced within the past few years — is helping loggers and mill operators meet today's tougher job requirements and production schedules.

Four powerful crawler tractors — 50 to 175 hp. — all built new from the ground up — are designed to take on the most demanding pulling, pushing, lifting, digging and dozing jobs encountered in the forests. Four Allis-Chalmers tandem drive motor grader models — 50 to 104 hp. — keep access roads in top condition. Matched allied equipment — bulldozers, winches, Tractor Shovels, arches — are setting new standards in the woods.

Throughout the nation's timber tracts, progressive loggers are using advanced design Allis-Chalmers equipment for greater speed, safety and productivity.
JOHN A. RUNDGREN. John is a District Ranger for the United States Forest Service at Bailey, Colo.

VICTOR O. SANDBERG. A letter dated October 28 enclosed newspaper clippings and a program concerning the dedication of a Memorial Carillon at Montana State University on October 18th in Missoula. The Carillon is comprised of 47 bronze bells, of which one is dedicated to the men who lost their lives in the Mann Gulch Fire near Helena on August 5, 1949. Among these men were Stanley J. Reba and Joseph B. Sylvia—at that time students at the Minnesota School of Forestry. Their names will also be included in a plaque set in the Main Hall. Vic is Training Officer, Region I and spending much time on the Spruce Black Beetle Program.

HOWARD B. SMITH writes in from Nevada City, Calif., where he is Forester on the Tahoe National Forest—three children ranging from high school to kindergarten. Working with two other Minnesotans on the Tahoe TEC NIE-HAUS, '33, and CARL SCHOLBERG, '39.

MISS ALICE STUART came all the way from Alaska to attend the 50th Anniversary of the School of Forestry. Miss Stuart is editor and publisher of "The Alaska Calendar," a book type issue containing large, attractive pictures of various scenes in Alaska.

RUSSELL A. YOUNGREN owns and operates a 1535 acre grain farm in the Red River Valley. The Youngrens have two girls—14 and 15 years of age.

1934

BARCLAY INFANTINO. Barclay reports that he is with the Penn. Dept. of Public Assistance Staff.

1935

JOHN J. AHERN is Institutional Parole Officer at the Folsum State Prison, Reposa, Calif. He sends "13th year with the Calif. Dept. of Corrections—both Calif. Div. of Forestry, and U.S.F.S. use inmates to man work and suppression camps. Family—four sons and one daughter. Cousin RICHARD AHERN, '40, works for U. S. Immigration and Naturalization Service in Reno, Nevada. Would like to hear from any of the old class of '33 and '35 who are in California."

CLAUDE S. ASP. Claude is a Major in the U. S. Air Force and is stationed somewhere in Iceland. Claude’s wife and son, Elliot, will join him there in February. Let us know if you receive the Paavoey as requested, Claude. Thank you.

ROY M. CARTER writes, "Our two young foresters, age 9 and 11, are on their second year of tree planting. It costs me money for I had to form a Forest Owners Co. and buy a 250 acre farm. Northern farming did not work so I’m busy planting more tree farms." Roy is Professor of Wood Technology (in charge of Wood Utilization Curricula) at N. C. State College, Raleigh, N. C.

ROBERT H. CLARK. Bob is Chief Forester for the Fordyce Lumber Co. at Fordyce, Ark. He sends the following, "1954 marks the beginning of the 16th year of forest management for the Fordyce Lumber Co. The company now employs six graduate foresters. Three foresters have the responsibility of procurement and management on three separate forest blocks. One forester is responsible for all forest investigation and research. Our cruising and acquisition is also under the supervision of a graduate forester."

ROBERT A. DELLBERG is Area Forestry Specialist for the S.C.S. at Ukiah, Calif. The word is "still in Ukiah and doing the same type of work as last year at this time. Regret I couldn’t attend the 50th anniversary celebration. Best wishes." So do we, Bob, and thanks.

BIRGER W. ELLERTSEN is Chief, Forest Management Investigations Section, TVA Division of Forestry at Norris, Tenn.

ROY J. ERSON. Manager of the Fullerton Lumber Co. at Eveleth, Minn.

HENRY L. HANSEN, Associate Professor, School of Forestry, U. of Minn. The Hansens have two sons—Trygg (8 years) and David (1½ years.)

ARTHUR L. HAWKINSON is in the building and contracting business in Minneapolis, Minnesota.

WILFRED H. LAUER, JR., sends us "same as last year, same work, same family, same staff. Everything the same except business conditions necessitating economy retracements to be prepared for the ‘recession.’" Bill is a wholesaler of forest products at Winona, Minn.

DONALD B. LYNCH, wife, and three daughters are all doing fine. Don is located with the Calvert Distilling Co. at Pine Bluff, Ark.

ROBERT W. MERZ is Forester in charge of the Buckeye Branch, Central States Forest Experiment Station at Athens, Ohio. There are three children—fifteen, ten, and seven years of age—in the Merz family.

FRANCIS I. MOORE—"The Moore children—Beverly Jean (16 years), Linda Ann (12 years), and Maureen Frances (3 years)—will accompany wife, Dorothy, and myself to Florida in April. We try to visit a new vacation spot once a year. Florida for 1954." Francis is Vice-President for the M. J. Salisbury Co. at Grand Rapids, Minn.

MARIUS MORSE writes from Trempealeau, Wis., where he is Forester for Brunkow Forest Products Co. that "Our home on the bluffs along the Mississippi River near LaCrosse is very handy to Highway 61 and the welcome mat is always out. This is great fruit country—our 10 acre apple orchard is progressing nicely and beginning to bear. Our five ‘apple pickers’ ought to give us a boost too." Thanks for the invitation, Marius.

LINCOLN A. MUELLER reports that there have been some changes. "With the consolidation of the Southwest and Rocky Mt. Stations, my headquarters was moved from Tucson, Arizona, to Fort Collins, Colo. Change brings me 1000 miles closer to my old stamping grounds, and adds South Dakota, Wyoming, Kansas, Nebraska, and Colorado to my old area at Arizona and New Mexico." His present position is Chief, Forest Utilization Service, Rocky Mountain Forest and Range Experiment Station, Forestry School Building, Fort Collins, Colorado.

NORMAN O. NELSON is District Ranger, Hayward District, on the Chequamegon National Forest at Hayward, Wisconsin.

URBAN C. NELSON is Wildlife Management Biologist, Leader, Federal Aid in Fish and Wildlife Restoration at Juneau, Alaska. The Nelsons have a son who is four years old. Thanks for the donation, "Urb."

LANSING A. PARKER. Lansing is Asst. Chief, Branch of Federal Aid for the U. S. Fish and Wildlife Service at Washington, D. C.

SULO V. SIVHONEN is one of the seven hardwood research advisors making up a steering committee of the recently formed Southern Hardwood Forest Research Group, which is backing forest management research with private capital at the Delta Research Center, U. S. F. S., Stoneville, Miss. Sulo is Manager of the Crossett Forestry Division at Crossett, Ark.

EARL J. ADAMS sends the news "that May 10, 1953, will be remembered as the day that Wendy Ann, our third child, arrived." Earl is Forester in charge of Forest Management for the Minn. Div. of Forestry.

GEORGE AMIDON, Director of Forest Mgt. for the Minn. and Ontario Paper Co. at International Falls, Minn., and writes, "Two boys and one girl—one boy just went into the service.—Boy, do I feel old!" Don't we all, George.

DONALD R. AMBROSEN is Refuge Manager for the Piedmont Wildlife Refuge at Round Oak, Georgia.

EDWIN J. BENDER "still foot-loose and fancy free" is Conservation Aid for the Soil Conservation Service at Waconia, Minnesota.

THOMAS R. EVANS. Tom reports "Not much news. We're still in the thick of the drainage battle trying to save some habitat for the ducks and duck hunters. Have been meeting up with lots of foresters in promotion of new uses for northern Minnesota wet lands. Had the pleasure of seeing two old classmates, HARRY MOSEBROKE, '35, and BOB ILG, '37, when I spoke recently at the Silver Anniversary of the Wisconsin Forestry Association." He is Field Representative for the Wildlife Mgt. Institute, Midwest States, at St. Paul.

KARL G. KOBES is Supervisor for the Amarillo Field Headquarters of the U. S. Fish and Wildlife Service at Amarillo. He writes, "Have had the opportunity to enjoy several visits with Dr. Dawson at Durango, Colorado."

DEL W. THORSEN is District Ranger for the U. S. Forest Service at Forest, Mississippi. Everything is "still the same—a wife and one boy (age seven)."

WALDEMAR A. WINKLER sends us a short autobiography "Married and one child (boy)—in Rocky Mountain Region since 1937 except for 4 years out for the war—previously on Pyramid District of the Rio Grande National Forest—now on Centennial District of Medicine, Bow National Forest." His present position is District Ranger.

1937
AXEL L. ANDERSON is Senior Pathologist, U.S.D.A., and Associate Professor of Botany and Plant Pathology, Michigan State College. He writes, "I am cooperating with both the Michigan and New York Agric. Exp. Stations on the development of disease resistant varieties of dry beans for the Eastern U. S. We are practically ready to release our first Navy Pea bean which is resistant to Anthracnose, an important disease of beans in this area. You can see that my work is not too closely related to forestry but it is interesting. Mrs. Anderson and I live in a small Cape Cod house here in East Lansing with our two girls, Nancy (age 7) and Linda (age 3)."

VINCENT W. BOUSQUET is Administrative Assistant for the Weyerhaeuser Timber Co. at Klamath Falls, Oregon.

ROY W. EGGEN writes, "Still travel between corporations' mills and woodlands in Lake States, Canada, and Alabama as Staff Liaison Forester. Wife, Ginny (U. of Minn., '38—Public Health), and three children, ages 7, 9, and 11, are all fine and get to Minneapolis 'a couple of times each.' Roy is with Kimberly-Clark Corp. at Iron Mountain, Michigan.

C. F. (FRED) GRAFTON is Vice-President of the Chapman Chemical Co. at Memphis, Tenn. He reports "Three fine children—two girls and one boy—plus a lovely wife (from Croquet)—all doing fine."

E. HAROLD HANSON and family is keeping busy—"Vice-Chairman of the Washington Section of the S.A.F. this year. That plus Boy Scouts, Girl Scouts, church work, etc., keeps us all busy. Went on a short camping trip in Virginia last summer and during our January snowstorm finally got a chance to unlimber our skis for the first time since we transferred to D. C. Linda (10), Greg (7), Keith, (3) are growing like weeds—and I'm losing more hair. I saw RAY FINN, '38, and JOHN MCGUIRE, '39, recently." Arne is Information Specialist, in charge of Publications and Inquiries Section, Div. of Information and Education, U.S.F.S.

RAYMOND E. JENSEN is Assistant Scientist at the Cloquet Exp. Forest at Cloquet, Minn. Roy wrote, "Still doing business at the same old stand. During the past year I had the pleasure of renewing old acquaintances at the School of Forestry's 50th Anniversary and at the S.A.F. meeting at Colorado Springs."

ROY A. JOHNSON is Assistant District Forester for the U.S.F.S. at Ely, Minn. The Johnsons have two daughters, 6 and 8 years old.

ROBERT M. KOLBE, Bob is Forester for the Connor Lumber and Land Co. at Laona, Wis.

EDMUND N. LAINE sends us "Naval aviation for six and one-half years. Discharged from the Navy in 1947. In lumber for past four years in California. Married a Texas girl. One daughter (3 years)." Ed is in Office Sales for the Sanoma Wood Products Co. at Healdsburg, Calif.

HARRY MOSEBROOK is now Forestry Resources Asst. in the Natural Resources Dept. of the U. S. Chamber of Commerce, 1615 H. Street N.W., Washington, D. C.

EARLE W. NELSON. Earle is Superintendent of Schools at the Okabena Conservation School at Okabena, Minn. The Nelsons now have three children—two boys and one girl.

SAMUEL S. POIRIER. Sam writes, "Transferred from Waldport on Siuslaw National Forest in June, '53, to Willamette National Forest. Son, Robert, is in 2nd grade, and daughter, Sandra, is in kindergarten. Wife, Alice Mae, is among the best homemakers (Iowa State-Institution Mgt.). Elected President of Eugene Local of the National Federation of Federal Employees and 5th Vice-President for Oregon for 1954). Former Minnesota foresters seen this year include—EM. THOMPSON, '37, Crescent, Calif., FRANK SHEARER, '37, H. LILIGREN, '39, and VICE OLSEN, '40." Sam is liaison man (Forester) with the Corps of Engineers on the Hill Creek Dam Project.

THOMAS A. SCHRADE is Regional Supervisor—River Basin Studies for the U. S. Fish and Wildlife Service, Minnesota. According to Tom "some home, same job, same family as last year."

CHARLES FRANKLIN SHEARER wrote us from Eugene, Oregon. "The family all fine—four children in school. Got the biggest bull moose to come out of the Clearwater in British Columbia this last fall—still have about 200 pounds of good prime meat in the deep freeze so would be willing to share with any good Minn. forester who ventures through Eugene. Saw SAM POIRIER, '37, the other day—he's on the Willamette just a few miles from here. We are all glad to see so much deserved recognition for Dale Chapman—wish we could have been on hand for your big winter meeting." So do we, Chuck. Chuck is Manager of the Mauk Seattle Lbr. Co. at Eugene, Ore.

F. MACRAE THOMPSON is Logging Manager for the Paragon Plywood Corp. at Crescent City, Calif. He says "Still worrying the logs into our plywood plant. Keep turning out good men like DAVE WELLS, '51, who is working with me. My girls get lonesome for a good Minn. winter. (Ed. Note: So do we!)—I haven't exactly missed that snowshovel yet. Regards to Brown, Kautert, and all others." Thanks and the same to you, Mac.

YALE WEINSTEIN writes from Albuquerque, N. M., where he is Forester for the New Mexico Timber Co. “We have a fair representation of Minn. foresters in the Southwest and I very often see CHESTER OLSEN, '47, and LEON HILL, '33. Both Leon and Chet are Rangers on the Santa Fe National Forest and have distincts that adjoin some of our timberlands. In January the Southwest Section of the S.A.F. had their winter meeting in Phoenix and I was delighted to have the opportunity to visit with CHARLES COOPER, '50, and RICHARD MCCUNE, '52. Chuck Cooper recently took over a wood-treating plant and operates the Northern Arizona Wood Treating Co. DickMcCune is with Southwest Lbr. Mills, McNary, Arizona. ERNEST O. BUHLER, '15, is retired from the U.S.F.S. and is living in Albuquerque, N. Mexico. On January 29, 1954, a Southwest Forest Pest Study and Action Committee held its first meeting in Albuquerque and much of the work was quartered by ERNIE KOLBE, '27. Ernie flew in from Portland for this meeting and left the following day in his usual no waste motion manner. As Western Pine Assn. Forester, he covers the country in the interest of better forest practices. Kindest personal regards to all and best of luck.” Thanks, and the same to you, Yale.

1938

FRED E. DICKINSON will be General Meeting Chairman of the 1954 National Meeting of the Forest Products Research Society at Grand Rapids, Mich. (May 5, 6, and 7). “Attended S.A.F. meeting at Colorado Springs and saw a number of old Minnesota friends including a number of the faculty.” Fred is Chairman, Dept. of Wood Technology, School of Natural Resources, U. of Mich.

RAYMOND F. FINN is Forester (Silviculture) at the Buckeye Research Center, Athens, Ohio.

ROBERT L. HILLER. Bob is Technical Representative for American Cyanamid Co. operating out of Chicago.

AXEL HUPPONEN writes, “For over a year, I have had my toughest job. Spent half of '53 in the V. A. Hospital at Minneapolis and the balance of the time at Lake Vermilion. This prescribed idleness is twice as bad as working. Still can't plan anything for '54 so there's nothing else to do but to continue this convalescence (loafing is a more accurate word for this prescribed retirement). A speedy recovery to you, Axel.

CELMENS KAUFMAN and wife, Alice, “enjoyed meeting so many Minnesota alumni at the Colorado Springs Meeting. I have occasion frequently to see GEORGE ABEL, '37, WALDY MOHL, '35, and S. SIHVONEN, '35. Neglect missing the 50th Anniversary Celebration.” The feelings are mutual, Celmens. Celmens is Director, School of Forestry, University of Florida.

DANIEL J. LEACH is Patent Examiner at the U. S. Patent Office in Washington, D. C. Dan reports, “Effective last July 1st, I was appointed C. O. of a Naval Reserve Company within the jurisdiction of the Potomac River Naval Command. My term of office is one year, to June 30 of this year because of a regulation requiring annual rotation of officers. Early in October, 1953, just prior to the 50th Anniversary Celebration, I was in the Twin Cities and took the opportunity to visit the school. It was good to see some old faces, as for instance, Prof. Brown, whom I want to thank for showing me around the school building and bringing me up to date on school activities. I regret it was impossible to stay for the Anniversary dinner but I had to return to Washington shortly thereafter.” It was a good get-together, Dan, sorry that you couldn't stay.

EDWARD J. LOULA brings us up to date with “Worked for the U.S.F.S. on the Superior National Forest at Grand Marais prior to entering U. S. Army in 1941—discharged with Service connected disability in 1945—unable to pursue forestry work because of disability—settled in Montgomery and married Annabelle C. Janutka of Montgomery in 1950.” Ed is parts manager at Tydell Chev. Co. at Montgomery.

GEORGE F. MUELLER is a Geodetic Engineer for the U. S. Coast and Geodetic Survey at Washington, D. C. He sends us “At present I am working in Florida. Spent the year in southeastern part of the country, that is outside of about three months spent in Minnesota recovering from illness.” It’s good to hear that you are back on the job, George.

EDWIN S. SEDLACEK is Resident Forester with the Rainier Forest Association, Inc., at Elbe, Wash.

OMUND A. SEGLEM. Omund is General Manager for the Radelle Div. of Commercial Laboratories. The Seglems have two children, Chris (7) and Jean (4).

PERRY E. SKARRA writes, “Family consists of wife and six children.” Perry is Superintendent for the Yakima Indian Agency at Toppenish, Wash.

DODD K. WALKER writes from “God’s Country” that “As a traveler for Lindsay Bros. Co. of Minneapolis, we manage to stay between the Wolf at the door and Uncle’s Tax Collectors. I travel most of Montana and Wyoming, especially those parts where hunting and fishing are of the best quality. If any of the Stump Thumpers drift into God’s Country by accident (you really don’t need a passport), look me up!”

1939

DANIEL M. BENJAMIN. Dan has just recently become Asst. Professor of Entomology at the University of Wisconsin. His note says, “On February 1, 1954, I leave the Milwaukee Forest Insect Laboratory, U.S.D.A. to accept a full-time research position at the U. of Wis. after 7 years with Uncle Sam. In this newly established position, I will conduct ecological investigations of forest insects.” Congratulations, Dan!

GEORGE BOYESON sends word, “still holding forth as Timer Management Asst. on the Mt. Baker National Forest. No change in family except possibly web feet from all the rain here. Had a fine visit with VINCE OLSEN, '39, since last Peavey issue; also ran into JOHN CARLSON, '40. Still trying to get in a visit to JIGGS RHEINBERGER, '40—maybe this year. Good luck!” Thanks, George, and the same to you.

C. EDWARD CARLSON is Associate Federal Aid Supervisor for the U. S. Fish and Wildlife Service at Atlanta, Georgia.

GEORGE E. M. GUSTAFSON writes from the Far North country, “Attended the Bureau of Land Management Conference on Lands held at Logan, Utah, as chairman on Alaskan Activities. Conference held latter part of August. Drove down the Alcan Highway with family. Spent a vacation in Minnesota and then drove back to Alaska via the John Hart Highway. Took a flying two-week trip to Florida to attend the National REA meeting, January 11-14. The change in temperature from Miami’s 80° F. to our record low of —20° F. two days later shows the adaptability of the human species to extremes in environment.” P. S. I was glad to get back to Alaska, the temperature rose to its normal 20° F. the next day.” George is Land Economist-Forester for the Bureau of Land Management at Anchorage, Alaska.
The Model 2MG above is a famous headliner in MALL'S extensive line ... a nation-wide contest winner that packs a dynamic 5 hp. into a 29 pound unit. It's loaded with futuristic features that make it the fastest cutting, finest handling, most dependable chain saw on today's market. Enthusiastic acceptance by experienced loggers has been tremendous — for in this saw MALL has incorporated over 30 years of experience — to give America's forest products industry the ultimate in modern power saws.

Here's a favorite of tree trimmers and orchard owners — a 12 pound electric saw that can be taken in a tree and used with one hand. Operates up to 200-ft. from its power source with extension cords from 115 volt AC or DC outlet or portable generator.

WRITE FOR FREE LITERATURE
RICHARD HULTENGREN is Forester with the IRR & R at Hibbing, Minn.

PHILLIP L. HUNTELEY is helping the wood-using industries and having fun at the same time. He writes, "I was just getting into the swing of skiing after 15 years when I broke my skis—two pairs. Legs all in good condition." Phil is Forester—Wood Quality Supervisor for the North Star Timber Co. at Duluth, Minnesota.

CHARLES E. HUTCHINSON is Dividend Expediter (Pro Assistant Cashier) for the Stock Transfer Dept., Bank of America at San Francisco, Calif. He wrote, "Have one son, Terry Paul (2%). Lost one girl and one boy because they arrived too soon. Have been in the Stock Transfer Dept. of the Bank of Am. about 1½ years. Put out dividends for the bank and fifteen other corporations. Sometimes it's easy and sometimes it's rough." May we express our delayed message of sympathy to you and your wife, Charles.

PHIL R. JOHN is Sales Manager for the Grinnell Co. of Pacific at Seattle, Wash.

GOODMAN K. LARSON sends us "Marge and I enjoyed the 50th Anniversary banquet, the Minn.-Mich. football game, the meetings, and all the fun that went with it. Fourteen years had grayed a few hairs and added a few pounds (also dependents) but other than that, the class of '39 looked about the way they did the day they left school. In December, Dave Brink, his wife, and two children made a surprise visit to us here in Grand Island. The Brinks were moving to the West Coast. Dave had accepted a position with the Weyerhaeuser Co. in Longview, Wash. They now live at 2749 Harding. During a short afternoon and evening, we managed to rehash many a forestry school and St. Paul campus episode."

GOODMAN is Area Supervisor, Missouri River Basin Office, U. S. Fish and Wildlife Service at Grand Island, Nebraska.

HILLIARD M. LILLIGREN is Timber Management Assistant for the U.S.F.S. on the Siuslaw National Forest at Corvallis, Oregon. He reports "same as last year—no change."

KERMIT OTT. Kermit is a Rural Mail Carrier at Frazee, Minn. His news items are: "(1) married—wife, Pearl, and daughter, Theresa (13 months), (2) other interests—operate 140-acre farm and am also Lt. Comdr., U.S.N.R., (3) hobbies—golf, bowling and hunting."

SCOTT S. PAULEY is Lecturer in Forest Genetics and Geneticist to the Maria Moors Cabot Foundation for Botanical Research, Harvard Univ., Petersham, Mass.

HOWARD A. POST. The Post family will be setting another place at the table soon. A third child is expected in April and he will have two brothers—Phil (7 years), and Stephen (5 years). Howie is a Forester with the Minnesota and Ontario Paper Co., International Falls, Minn.

CARL B. SCHOLBERG reports, "Was transferred from the Plumas to the Tahoe in July, 1953. Have worked quite a bit with HOWARD SMITH and TED DIEHAUS, '33, since the move. I also see HARRY DAVIS, '39, and FRANK TUCKER, '39, of the Klamath once in a while. LES HENDRY, '47, JOHN FROJEN, '50, and BILL HOWARD, '51, are on the Plumas also and I see them once in a while. As you can see, there are quite a few Minnesotans in this area and there are probably more. We all would have enjoyed being at the 50th Anniversary dinner but the time of the year was rough for us." We're sorry that you couldn't make it too, Carl. Carl is District Ranger for the U.S.F.S. at Sierraville, Calif.

OGDEN L. SHUTES. Ogden is Manager (Partner) of a commercial photography and camera store at Arcadia, Calif. He wrote, "Seems like I'm a long way from forestry but the fire in the Angeles Forest was too close for comfort. Completely burned off the watershed in the foothills back of us, so now every time it rains, we have a serious flood problem. The Angeles Forest Warehouse and Equipment Center is down the street from me and the Forest Service has been busy shooting pictures of the fire and flood damage so they have been one of my better customers the past few weeks for film and equipment. Saw BOB DUNNE, '39, last spring when he and his family drove through on their way back to Minnesota after Bob was released from active duty with the Air Force."

DAVID B. YESALL is Assistant Supervisor, Bureau of Wildlife Development, Minn. Division of Game and Fish at St. Paul, Minn.

CHARLES H. WHITE has been named Secretary-Manager of the Walnut Mfrs. Assn. Congratulations, Chuck! He has been Asst.-Secretary since 1947 and in that capacity headed the organization's trade extension program. Prior to his work with the Association, Chuck was with Gamble Bros., Louisville, Ky.

ALDEN L. WUOLTE is District Ranger on the Sequoia National Forest at Porterville, Calif.

1940

ELDON A. BEHR sends us, "I am still trying to grow trees in my yard and vegetables in the garden. It would be much easier if we had some of that Minnesota soil here. Recent acquisitions for the yard are 3 English hollies and 3 American hollies. I am also nursing a moraine locust, tulip tree, white ash, European birch, and an oak from an acorn from Germany." Eldon is Manager, Technical Dept. for the Chapman Chemical Co., Memphis, Tenn.

CHARLES ROBERT BINGER is Forest Management Officer for the Ontario-Minnesota Pulp and Paper Co., Ltd., Fort Frances, Ontario.

CLARENCE B. BUCKMAN is Senior Timber Appraiser for the Minn. Div. of Forestry at Littlefork, Minn. He says, "All is well on the home front but the deep snow is something again. Regards to my old friends and I would like to hear from them." The address is Box 247, Littlefork, Minn.

ROSS J. DONOHOWER writes, "No change—must be a deep rut. Expected to see more '39 and '40 fellows at Anniversary." Ross is a Log and Lumber Buyer at Winona, Minnesota.

WALTER C. ERSO is married and has two daughters. He notes, "Saw LEM BLAKEMORE, '40, last week in Washington, D. C.—expect to see Larry Jendro shortly in Philadelphia." Walt is Sales Engineer for the Georgia-Pacific Plywood Co. at Philadelphia, Pa.

ROBERT G. HELGESON sends us, "Still healthy, broke, and not much wiser than last year. Had a good visit with Dr. Kaufert here in Tacoma in January. Congratulations on your very successful 50th Anniversary." Thanks, Bob.

WILLIAM J. LEHMKUHL brings us up to date with "Still in Milwaukee at the John Schroeder Co. running all of their building jobs (Construction Supervisor). Except for a short time in forestry work in South America and here in the States, I've been pretty close to the construction work in one way or another. At present, I am putting up a new home for my family northwest of Milwaukee which, of course, keeps me going quite steady. Have three sons but can't get any work out of them yet as they are only 2,

7, and 9 years of age. Sure would like to get together
with the old "622" club members for a little game again,
but we are scattered too far apart. Had a pleasant sur-
prise at Christmas when DICK HULTENGREN, '39, and
wife dropped in for an evening.

EDWARD W. LOOMIS is Forestry Assistant for the Dolly
Varden Lbr. Co. at Areata, Calif.

LOREN A. McDONALD states, "Have two girls now—
Laura Ann (2½ years), and Janet Mae (2 weeks). Should
be in our new house before the Peavey comes out. Sorry
that I was not able to make the October 23rd meeting."
So are we, Mac, and I hope that we have correc-
ted to your satisfaction the "slip-up" made last year.

JOSEPH MELTZ. Joe is Senior Civil Engr. Asst. with the
Los Angeles County Flood Control District.

MAKES H. MICHELS is District Ranger on the Sierra
National Forest for the U.S.F.S. at Mariposa, Calif.

JOHN GELESON MILES writes, "Still only 7 children—
busy building house on 33 acre 'ranch' at Frances. Raised
7 geese and 4 rabbits last year; may work up to pigs
by 1955." John is Resident Forester for the Weyerhaeuser
Tbr. Co. at Raymond, Wash.

WILMAR H. MONSON is Group Armament Officer with
the U. S. Air Force in Korea. He is expected home in
April. Thank you, Mrs. Monson, for supplying us with the
information.

GEORGE E. OLSEN sends us, "Our year was blessed
with No. 3, Priscilla Nilsen, and that makes one boy and
two girls. My travels still take me into a lot of remote spots
over the country where I have a chance to meet Minnesota
forester. I'm still working on 'penta' for preserving wood.
It's going well and we would welcome a note from Minnesota
foresters interested in making wood last longer in use." George is with the Dow Chemical Co.

TONY F. PERPICH is a Lt. Col. in the U. S. Army and is
at present stationed at Ft. Monroe, Va. He wrote, "Gradu-
ated from the regular course of the Command and Gen-
eral Staff College, Ft. Leavenworth, Kan., in June, '53.
I was the Field Artillery Representative on a Dept. of Army
inspection team of Am. Troops in Germany, Austria, and
Trieste." The Perpich's have three children—Ann (9), Jeanne
(7), and Tom (5).

ROBERT R. RHEINBERGER writes, "Had a very interest-
ing gathering at the breakfast meeting of the Minn. alumni
at the Western Forestry Conf. held in Seattle last De-
cember, 1953." Bob is Chief Forester for Pope and Talbot,
Inc., at Port Gamble, Wash.

ANTHONY E. SQUILLAGE is Research Forester with the
Northern Rocky Mt. Forest and Range Exp. Sta., at Miss-
soula, Mont. in the U.S.D.A. Employee News Bulletin (July
13, 1953), Tony was given a Certificate of Merit for Supe-
rior Accomplishment—sincere congratulations and besh
wishes to you, Tony, for a job well done.

MAURICE J. STEENSLAND is a Consulting Forester, a
Registered Land Surveyor, and Arborist at Dothan, Ala.
The Steenslands have two boys—ages 4 and 7.

1941

ROBERT BARKOVIC. It is wonderful news to hear that
Bob has returned safely after being held a prisoner of war
in Korea. Bob was recalled to active duty as a reservist
in October, 1950—he was shipped overseas in the fall
of 1950. Bob was wounded in the spring of 1951, returned
to frontline duty and was captured on August 29, 1951.
There is more to the story taken from the "Mandonian"
(Sept.-Oct. 1953). Bob is now back as a Forester with the
Minn. and Ontario Paper Co., Int. Falls, Minn. Welcome
home, Bob!

ROBERT T. BILSTEIN reports, "After 11 years with TVA,
I resigned to accept a job with the present company to
operate a hardwood yard in Sheffield, Ala. The company
manufactures Chickamouga branc oak flooring and
cedar closet lining. The yard in Sheffield will handle up-
wards of 4 million feet of oak lumber annually. Future
plans call for handling of other species besides oak. The
whole family of 6 spent 3 weeks in Minnesota last sum-
mer. It was very pleasant indeed. We visited Itasca last
summer; many changes and improvements have been
made in the past 15 years since I'd been there."

AUGUST E. BLOCK is District Ranger with the U.S.F.S.
at Salem, Mo. He writes, "No change—job or family status,
Daughter, Linda, now 5 years old and son, Bruce, is 3."
Thanks for the additional contribution to the Peavey,
August—it is greatly appreciated.

SUMNER A. (AL) DOLE, JR. Al is Supervisor of Field
Operations, Management, and Research Division of the U.
S. Fish and Game Dept. at Concord, N. H. He sends,
"Have a nice brick Cape Cod house (6 rooms) in the coun-
try. We have twin boys (4 years old) and a girl (5½
years). Between my family and job, I don't have the time
I'd like to have available to take care of my 20 acres
of woodland. Would welcome visits from any Minnesota
forester." Thanks for the invite, Al.

WILBERT A. GRAUMAN is farming at Albany, Oregon.

CHALMER W. GUSTAFSON is short and to the point with
"No news, no family, and no prospects." Chalmer is
Ranger with the U.S.F.S. at Pierce, Idaho.

VERNON HAHN writes, "Visited some of the self-em-
ployed foresters on a 1954 trip to Wis., and Minn. We all
have the same problems—keeping influent greater than
exfluent." Don't we all, Vern.

ANDREW HAUGHOM. Andy is a Lt. Col. in the Air Force
stationed at Wald-Chamberlain but soon to be reassigned
to duty at Teheran, Iran.

ROBERT W. JOHNSON is District Forester, St. Helen's
Tree Farm at Castle Rock, Wash. He wrote, "Family fine.
Another interesting year in the 'tall timber'—a splendid
fire season record—improved cutting practices and better
utilization. A good year for the sportmen, too!"

HOWARD B. OSMUNDSON is Work Unit Conservation-
ist, S.C.S., and sends us, "Like the Phoenix climate, we
are arising from the ashes of last year's fire. By the 'we'
I mean there is no longer a 'Batch Camp' being run on
Big Dry Creek. That is also the reason I did not attend
the Anniversary Celebration on October 23. We were
married October 18—wife, Judy, thought that I should be
along on the honeymoon. Since then she has allowed me
to keep my nose to the grindstone building a new house.
It should be an added inducement for some of you wan-
dering foresters to stop and gnaw a steak with us."
Sounds like a good invite, Howie. Sorry about our "slip-
up" on last year's Peavey—let us know if this situation
has been corrected.

THOMAS PARTRIDGE. Tom reports, "Still managing a
lumber store. Business has been exceptionally good. In
addition to our regular business, we built a 30-house sub-
division and plan to do about the same in '54. Often
think about my old buddies—might even write a few let-
ters." Tom is located in Newton, Iowa.

SEDGWICK C. ROGERS writes, "Last September we
started building a new house in Cherry Court, Appleton.
Should be in sometime this spring—son, (Eric (1 year), is

CLARK EQUIPMENT COMPANY
BATTLE CREEK, MICHIGAN
a one man wave of destruction. We need a new house—he has the old one tottering.” Sedgwick is Research Chemist for the Kimberly-Clark Corp. at Neenah, Wis.

MARVIN E. SMITH, Marv is Extension Forester for the State of Minnesota. He wrote, “Jumped from suburban living to a house in St. Paul on a 40' lot. Don’t miss the long driveway to shovel in winter or large lot to mow in the summer. Guess I’m not home enough to mind the reduced ‘elbow room.’ Like to putter as a weekend handyman.”

JOHN E. WISHART is District Forester for the Crossett Lbr. Co. at Crossett, Ark.

NORBERT A. ZAMOR reports, “Our family was increased in 1953 by the addition of our third son, Steven.” Norbert is Woodworking Engineer for the Western Electric Co., Inc., Kearny, N. J.

1942

BRUNO L. BERKLUND is still Forester for the Neokosa-Edwards Paper Co. at Port Edwards, Wisconsin.

HIRAM HALLOCK is still operating a sawmill at Madison, Wis.

ORVILLE J. HATLE reports from Iron Mountain, Mich., where he is District Manager for the Wm. Bonifas Lumber Company.

ARTHUR L. JANURA is at present Asst. Supt. of Maintenance for the Forest Preserve District at River Forest, Illinois.

HOWARD B. SCHMITZ writes, “No new additions. My wife and I have just completed our first year as owners and operators of Kollers Spooner Lake Resort and can report a successful season. Hope for another like it. Would like to hear from some of the class of 1939.”

1943

DAVE W. FRENCH is an Assistant Professor for the Dept. of Plant Pathology, Institute of Agriculture, U. of Minn. Dave has been active in research dealing with the Oak Wilt disease.

GORDON C. MAXON is an Agent and Broker for the Penn Mutual Life Insurance Co. and is still setting records. He has been named Honor Agent of the Forrest J. Curry Agency in San Francisco. He has placed in force over $2,000,000 of new life insurance. A bare handful of life underwriters ever achieve this goal. Congratulations, Gordy! The Maxons have three girls—Shari (4 years), Pamela Sue (2½ years), and Judy Beth (under one year). Gordy says, “I hope some of the old gang will drop in to see us. The welcome mat is always out.” Thanks for the invite, Gordy.

ROBERT F. NELSON, President of Forestry Enterprises, Inc., St. Paul, Minn. The Nelsons now have three children, everyone is well and happy, and the new house is just about finished.

1944

ROBERT C. BUCHHOLZ is now Resident Manager of the Draper Corp., Biltmore, North Carolina.

PAUL N. GOODMAN is Extension Forest Products Marketing Specialist at Oregon State College and writes, “One new ‘forester’ added in October, making total score of 2 ‘fern-hoppers’ and 1 girl.” Congratulations, Paul.

1945

BERNARD GRANUM writes, “Added another boy to our family. We now have three boys. Had a good time at the last S.A.F. meeting held at Colorado Springs. Visited with many Minn. grads, BILL BREDE, ’46, was sporting a new super Buick. You can inform the forestry club members from 1944-1946 that Bill can now smoke a cigar without getting sick.” Bernie is now Forestry Supervisor for the IRRR.

1946

VICTOR H. CLAUSEN has a position as Engineer for the California Redwood Association at Eureka, California. Vic is still a dyed-in-the-wood Redwooder and reports “(1) Debra Lynn was born in July, 1953, bringing the total to two, (2) there are almost enough alumni in this area from the U. of M. Forestry School to start an Alumni Forestry Club here. (There are five members within a few miles), (3) the invitation to show off a certain red-colored species of wood to anyone from the U. of M. still stands. This notice has been posted for three years, but still no takers.”

1947

ROBERT W. BAUCK sends a hearty invitation to visit his Woods Industries Laboratory in New Brighton, Minn. Bob’s business is becoming more varied and interesting each year. His family remains the same—a wife, a daughter, and a son.

GLENN H. DEITSCHMAN and wife vacationed the past summer in Arizona. Glenn ran into “only” one Minn. grad—he was “LINK” MUeller, ’35, who was located at Flagstaff at that time.

JALMER J. JOKELA writes, “Married June 27—except for a ‘fishing’ trip to northern Minn. have been busy ever since—building a house.” Jalmer is doing research for the Dept. of Forestry, Univ. of Illinois at Urbana.

RUSSELL V. JONGEWAARD is a Soil Conservationist with the U. S. Soil Conservation Service and he is living at Foley, Minn.

RALPH W. LAW is Head Forester for the Frost Lumber Industries Division of Olin, Ind., Inc., at Nacogdoches, Texas. His note says, “Have built ourselves a new home and are really enjoying it after renting houses for the past few years. The family hasn’t changed. Still have two wild Indians. We are gradually getting a sound management program started on the Olin lands in Texas, La., and Ark. Have a good bunch of men and ample problems to take care of. We have a group of Minn. men scattered around east Texas so get together once in a while to talk over old times.”

ORVILLE E. LIND and family have moved to Richmond, Virginia, from Marieville, Pa., where Orville is an Asst. Ranger for the U. S. Forest Service. The Linds have a new baby girl, Karin Myra, born on January 17, 1954. Congratulations, Orville.

RUSSELL G. KNUTSON likes the fishing up in northern Minnesota and reports, “My wife and I attended the 50th Anniversary banquet and the football game. We thoroughly enjoyed ourselves and are looking forward to the 75th Anniversary but we hope that it isn’t that long before we see our classmates again.”

RICHARD M. MARDEN is Forester for the Homestake Mining Co. at Spearfish, S. Dak. The Mardens have a daughter, Karen, who is 6 years old and a son, Michael, who is almost 3 years old.

GEORGE R. NELSON is in lumber sales with the Northern Lumber Co. and they have opened a new, improved warehouse and office facilities in Minneapolis.

HOWARD E. OLSON writes, “Happy to report a new son, Jeffry, born to us October 14, 1953. I’m still traveling far and wide for the Chapman Chemical Co. selling pentachlorophenol. I wish to congratulate the Forestry staff

and all who participated in making the 50th Anniversary Celebration the tremendous success which it was. This was by far the largest and finest affair of its kind (or any kind). I've heard many praises sung for the outstanding event.” We thank you for your very kind words, Howard.

**CHARLES E. SCHLESINGER** is District Ranger for the U.S.F.S. at Rico, Colorado. Another daughter, Gail Ann, was born to the Schlesingers on July 16, 1953. Congratulations, Chuck.

**WARREN A. VONG** says, “After 2½ years in Virginia, I’m becoming a real Southerner. ‘You-all’ come see me.” Warren is Territory Sales Representative for the Insulite Division of the M & O Paper Co.

**JOHN R. BERGERON** visited **GLENN DEITSCHMAN** ’47, at Carbondale, Illinois, last summer and spent a wonderful week looking over that part of the country. John is a Forest Ranger I with the IRR & R and still operates out of the Lake States Experiment Station at St. Paul.

**JOE CHERN** is with the Material Container Division of the Forest Products Laboratory at Madison, Wis.

**PAUL E. COLLINS,** at last report, is still busy with teaching and experimental shelterbelt research at South Dakota State College where he is an Assistant Professor of Horticulture and Forestry.

**ALTA E. EHLY** writes that he now has 3 daughters and is owner of a new home. Al also received a promotion to Forestier III and he was assigned an assistant in the past year. Congratulations, Al.

**RAY HANSON** is teaching at the Chester Jr.-Sr. High School, Chester, Calif., and is a resort manager in the summer. The Hansons were blessed with a daughter, Anna Lise on December 4, 1953. They also added a new wing to their house last year. Ray keeps himself busy as he is Sec.-Treas. of the Lassen Almanor forum for 1953-54 and was chairman during 1952-53. Ray also adds that his forestry class planted 2,000, 2-0 Ponderosa pine in the spring of 1953. Congratulations on the new arrival, Ray.

**W. HEINSELMAANN** is Research Forester for the Headquarters Forest Research Center, LSFES at Grand Rapids, Minn.

**CARLTON A. HOLMES** is with Halvorson Trees, Inc., in Duluth, Minn.

**ARNOLD R. JOHNSON** and wife became the proud parents of a daughter on March 18, 1953. Arne is Land Commissioner for Koochiching County here in Minnesota.

**ROBERT S. JORGENSEN** is Realty Asst. for the Fish and Wildlife Service at Swan Island, Portland, Oregon. Bob writes, “We like Portland better all the time, in fact we enjoy hearing from anyone traveling through this area.” Dick is Personnel Manager for the Winton Lumber Co. at Martell, California.

**ROBERT N. WEBB** sends us from Crosett, Ark. “We now have 3 children—Mike (age 3½), Greg (age 2), and Kathleen (age 3 months).” Bob is Asst. District Forester for the Crosett Lumber Co. Congratulations on the new arrival, Bob.

**JOHN W. MANGAN** is Asst. Sales Manager for the W. A. Woodard Lumber Co., Cottage Grove, Oregon.

---

**1948**

**JOHN R. NOBLE** is with the Waldorf Paper Co. in St. Paul, Minn., as a Mill Chemist.

**EARL ORBORNE** visited **GLEN Y. DEITSCHMAN,** at last report, was Manager of the Consolidated Lbr. Co., Retail Yard, Ellsworth, Wis.

**RODNEY B. SCHUMACHER** reports that he is still in the Minneapolis area as Sales Representative for the Masonite Corporation.

**RICHARD L. SPENCER** writes, “Now have 2 boys, Dick and Brooks, and we expect another child in June. Would enjoy hearing from anyone traveling through this area.” Dick is Personnel Manager for the Winton Lumber Co. at Martell, California.

**JACK SIMMONS,** ‘49, about once a year in Glendale, Calif., where Jack is selling any kind of lumber that you want to buy.” Lou is Sales Manager, Plywood and Novoply Departments, U. S. Plywood Corp., Redding, Calif.

**ED BRAA** is District Representative for the Weyerhaeuser Sales Co. at Longview, Wash.

**CHESTER W. CURTIS** informs us that he was married September 5, 1953, to Miss Betty Ann Schneider. Congratulations to you, Chet and Betty. Chet is a Chemist for the Waldorf Paper Co. in St. Paul.

**EDWARD ERLICKSON,** who has been serving Insulite as a promotional representative with headquarters at Hartford, Conn., was promoted last March. In his new assignment, he will be Dealer Territory Representative in northeastern and north central Texas with headquarters at Dallas. Congratulations and Ed, do you miss the U. Village?

**OLAF GRETE** is an Asst. Branch Forester for the Weyerhaeuser Tbr. Co. at Raymond, Wash., and writes, “Caught a 35 pound Chinook salmon last summer.” Now I’ll tell one; Ole—I saw you “catch” the big ones up in northern Wis, in the summer of ’48. In a serious vein, the Weyerhaeuser News reports from the West Coast that Ole is in charge of salvage logging for the Willipa Branch of the Weyerhaeuser Tbr. Co. under Logging Supt. Millard Moe. He was handed a crew of men and some rubber-tired equipment and told to “salvage the blow-down and fire-kill before the bugs and weather could get at it. Ole and his crew bulldoze short spur roads to reach into the afflicted areas. Then the cutting crew—usually three men—move in with one-man power saws and buck the windthrow into log lengths. This operation is dangerous and requires a high degree of skill and experience. Mobility and a flexible utility are essential to successful salvage operations. Perhaps Ole’s success can be best described by Millard Moe, Ole’s boss when he says “Ole will go far. He only has to be told once and he knows what you are talking about. He’s picking up logging faster than anyone I ever knew.”

"A FRIEND"
PAUL M. HAACK, JR., is on the Michigan Forest Survey as a Forester for the LSFES. He wrote, "On Michigan assignment for over a year already. Boyne City region is wonderful, boasting beautiful, big, clear lakes, northern hardwoods, and high to rolling hills. Missed 3 bow and arrow shots at deer. Did pretty fair on "pats" and rabbits. Steven Mark Haack born to Kathy and me on November 30, 1953, and weighed 7 lbs. 3½ oz.—he's a dandy! Forest survey work in this area should last until this summer sometime, thence on to the UP." Congratulations on the 1953 "addition," Paul and Kathy.

JOHN B. HLASTALA wrote last summer that he is planning to enter Humboldt State College, Arcata, Calif., to obtain a teaching certificate and teach high school conservation.

MEREDITH INGHAM reports "switched from Ranger position to Naturalist work with the National Park Service in July and was transferred to Washington, D. C. Family still consists of one wife and one child but we expect another child along about July. I'd like to invite any of the boys or members of the staff who happen to be in D. C. to give me a call at the Interior Dept. when in town."

Frank D. Irving is District Game Manager for the WIs. Cons. Dept. and writes, "Have added 1 dog to family since last year. Expect next addition in June. Still wrestling with game problems and making very little progress."

HOWARD B. JOHNSON is rounding out two years of residence in Hibbing and his present position is Forester II in charge of Forest Survey for the I.R.R. & R.

H. WM. JUNILLA has left Uncle Sam's service as a Jet Photo Pilot and Photo Briefing Officer (tour of duty on the U.S.S. Valley Forge to Korea) and is "returning to the International Paper Co. in Mobile, Ala., some time in February. Daughter, Mary Elizabeth, was born August 13, 1953." Congratulations, Bill and Anne.

George Kilen is "still with the Engineering Dept., Weyerhaeuser Trb. Co., Vail-McDonald Operation. Have recently completed about 8 miles of road into virgin Douglas-fir country. Expect 10-15 miles this year. Active in scouting as scoutmaster. Our boy is 2½ years old now and we are expecting an addition in March. Sorry I couldn't be at the 50th Anniversary Celebration. Hope to see you all this fall or winter." We'll be looking for you, George.

Phillip R. Larson, Phil is a Research Forester for the Southeastern Forest Experiment Station at Lake City, Florida.

Merle P. Meyer is working for his Ph.D. here at Minn. and doing an excellent job of teaching Aerial Photography and Range Management.

William R. Miles sends us "Newest addition to family was Timothy born January 15, 1954, joins Billy and Kathleen. Certainly enjoyed the reunion last fall and many thanks to the staff for a fine program and that swell football game. Am in same job in same locality—you'd be interested in the fact that we have 6 inches of snow on the ground and the natives consider themselves snowbound."

Congratulations, Bill, and thanks for the pamphlets on D-fir. Bill is Land Agent for the Weyerhaeuser Trb. Co. at Montesano, Wash.

Stanley E. Olson is a Forester with the Weyerhaeuser Trb. Co. on the White River Tree Farm near Enumclaw, Wash. According to the Weyerhaeuser News, Stan is working with Gene Steinbrenner, '49, on D-fir seedling survival experiment. The experiment is an attempt to reforest a steeply pitched burn area, (too far from a seed source to reforest naturally), which was badly scorched by fire a year ago. Nothing will be done to help the seedlings which are facing badly—the seedlings will grow and die as they would under normal planting conditions. Let's hear from you, Stan.

James E. Peterson is "getting overrun with girls. Looking for a boy in February." Good luck, Jim, and I'll check on your last year's Peavey. Jim is Asst. District Supervisor for the Crossett Lbr. Co. at Monticello, Ark.

Darrell F. Russ writes, "The two Green Hall students employed in our summer camp did a good job again last year. I was married last summer and toured the western forests and National Parks." Congratulations, "Putt." Russ is Forester in charge of the Green Mt. Forest at Norfolk, Conn.

Warren J. Sanderson, formerly a State Project Forester, was in a B-50 bomber shot down off the coast of Siberia, July 29, 1953. Only one survivor (not Warren) was picked up by our rescue teams; other survivors were believed to have been picked up by Russian vessels in the area.

Richard E. Schaefer is a Forester with the Mt. Emily Lbr. Co. at LaGrande, Ore. Dick writes, "Have a new adopted son. Was elected Vice-Chairman of the Blue Mt. Chapter of the Columbia River Section of the S.A.F. Visited Lou Boudreau, '49, in Redding, California, who is Sales Manager for the Shasta Plywood Co." Congratulations, Dick, and enjoyed your recent letter.

Richard E. Schroeder has joined the ranks. He married Miss Leona Carrier of Bend, Oregon, on July 11, 1953. Congratulations, Dick. John Bergeron, '48, and wife attended the wedding. Dick is Forester for the U. S. Bureau of Land Mgt., Div. of Forestry, Bend, Oregon.

Eugene C. Steinbrenner writes, "Expecting first addition to family in March. Will attend Univ. of Wash. the spring of 1954 to complete work on Ph.D." According to the Weyerhaeuser News, Gene is the Forest Soils Specialist on Weyerhaeuser's forestry research staff and is applying the scientific method to the problem of seedling survival. Gene hopes to establish the survival capacities of three different age classes of D-fir seedlings and the relationship of soil moisture and soil temperature at various depths to seedling survival. The area to be reforested is a steeply pitched burn on a side-hill (too far from a seed source to reforest naturally), which was scorched severely by a fire a year ago. The area is typical of nearly 10 percent of logged or burned areas in the Pacific N. W. that must be reforested artificially. Good luck, Gene, and let us know how your project is progressing.

1950

George Badovinac is a Salesman for the Hammond Lumber Co. at West Covina, California.

Robert E. Bergquist, Bob is Manager of the Consumers Lumber Co. at Spirit Lake, Iowa.

John Besse writes, "In July I left the TVA and moved to Canada with my wife and one daughter (1 year old). At Sault Ste. Marie, Ontario, I accepted a job with the Roddis Lbr. and Veneer Co. as Logging Supervisor on the Algoma Central R. R. land on which Roddis has the logging rights. The present cut on the land is about 4000M feet per year of which approximately 50% is yellow birch and the other half is yellow birch and white pine sawlogs."

Ray Brendemuihle is a Research Associate with the Forestry Dept., Iowa State College, Ames, Iowa. He reports, "Still a family of 3 with no ideas about changing that situation just now. The problem of managing the bottomland hardwoods in this state consumes most of my working day."

ROBERT E. BUCKMAN. Bob's position at questionnaire time was Research Forester at the Northern Rocky Mt. Forest Experiment Station. However, a later letter indicates that Bob may pursue his college education again at the U. of Mich. for a Ph.D.

CHARLES F. COOPER is living at Snowflake, Arizona.

MARTIN A. COYER signs in with, "I'm a Forester with the Diamond Match Co. at Cloquet. Have the pleasure of working with RAY WOOD, '38, JUDD WELIVER, '48, and EUGENE COYER, '50 (Ed. Note: Any relation, Mar?). all foresters for the company. Spend summers cruising and winters buying match bolts. Still single and behaving very well?"

LeROY FISH notes, "Married September 12, 1953. Spent a nice vacation with my wife out in Colorado traveling through the mountains. Still working for Lampland Lbr. Co., St. Paul. Manage to get out and call for a square dance or two a week." Congratulations on your marriage, LeRoy.

JOHN W. HAMILTON was married last June. Congratulations, John. He is Forester I, Private Forestry, Minn. Div. of Forestry and his work is entirely with hardwoods. He reports "Very interesting work—lots of forestry work needed in the hardwood regions."

WAYNE HANSON is a Forester, Private Forestry, Minn. Div. of Forestry and is short and to the point with news about yourself and family, ie. "None, still single."

JACK R. HELM deserves double congratulations. The Helms have twins, Robert and Linda, born October, 1953. Jack is a Topographic Cartographer for the U. S. Geological Survey at Jasper, Indiana. How is the trout fishing, Jack?

DONALD E. JONES is a Timber Inspector for the Western Electric Co. at New York, N. Y.

LOYD S. KNUTSON is District Executive and Director of Vol. Trng. for the Boy Scouts of America at St. Paul. The Knutsons have two girls, Lauralee (3 years) and Janet (7 months).

RALPH J. KURKA writes from far-off Germany, "We've enjoyed our stay in Germany—been here since July, 1951, but will be glad to return to the good old U. S. A. in June. A recent addition to the family, Kathleen (born January 22) has made brothers (Jim—6 years and Dan—5 years), very happy—also Mom and Dad." Ralph is Asst. Bn. Operations Officer for the H. and H. Bty., 91st AAA AW Bn (M), New York, N. Y. (A.P.O. 46).

GORDON L. LANDPHIER reports from Madison, Wis., where he is Parts Manager for the Landphier Motors. The Landphiers have two daughters—Linda (3½) and Dianne (2 years).

VERNON V. LINDHOLM is Assistant Ranger, Isabelle District, Superior National Forest, Isabelle, Minn.

KARL LOERCH has been named Extention Forester for Nebraska to replace Earl G. Maxwell.

LENNART E. LUNDBERG was discharged from the Army in September, and returned to the U.S.F.S. October 26. Lennart is Asst. Ranger at Salem, Mo., and the Lundbergs had double blessings last April 6th with the arrival of twin boys, Daniel and Arnol. Congratulations, Lenny.

DELMAN F. MARSOLE is Asst. Ranger on the Salmon National Forest at Salmon, Idaho.

EDWARD MERVICH writes, "Am located in coastal Redwood belt. Most of the time spent in fire prevention and reforestation of cutover lands. Have a growing problem in bear damage to young growth Redwood and Douglas fir stands. The damage is similar to porcupine stripping in Minnesota." Ed is Forester for the Hammond Lbr. Co. at Samoa, Calif.

JOEL H. NITZ is on the move again with "moved from Oden, Ark., to Hot Springs National Park, Ark. The Park Service controls world famous mineral Hot Springs Bath Houses. I still haven't taken one of their baths yet. Have recently been marking a lot of shortleaf pine. Just finished scouting and marking blowdown timber. Tornado season is now upon us." Joel is Asst. District Ranger for the U.S.F.S. at Hot Springs National Park, Ark.

DALE J. PFANKUCH. Located at Preston, Minn., as a Project (Farm) Forester for the Minn. Div. of Forestry. Dale has been doing some research, to wit, "During the year, there have been two additions to the Pfankuch household—a dog and a cat. Survey on the subject of children several years ago showed that college graduates averaged about one and a half. After reading last year's Peavey, I found that most Minn. foresters aren't interested in statistics when it comes to the matter of the number of children they should have. It looks like the class of 1950 has already exceeded the quota but I'm doing my best to hold down the average. To date my score is still zero. (Ed. note: Does this indicate that Minn. foresters don't have enough statistics or that they don't read enough, Dale?) Woodlot owners are showing more interest in the forest industry in the seven counties in my district. There are about 462,000 acres of timber land in southeastern Minn. This represents about 9% of the privately owned woodland in the state. As more woodlot owners accept the services offered by the Div. of Forestry, there should be work for several more foresters in this section of the state. During the year I had the 4-H club members in one of the counties in my district collect tree seed for the state nurseries. When the final tally was in, 122 members had collected 6,255 lbs. of seed. Most of the seed was black walnut but other species also collected were butternut, white oak, hard maple, hickory, and basswood. The County Agent and I feel the project was a success and plan to make it an annual event." Sounds like a good idea, Dale.

STANLEY B. RINGOLD sends us, "We are quite busy, my wife teaching high school and our daughter making sure we have few idle moments. The job is very interesting with lots of work." Stan is Asst. Forester for the Minn. and Ontario Paper Co. at Big Falls, Minn.

EUGENE P. ROMANSKI informs us that L. E. HENDRY, 47, is District Ranger, Spearfish District, Black Hills National Forest; DON PRICE, '53, is District Ranger, Rockford District, Black Hills National Forest; DICK MARDEN, '47, is Forester for the Homestake Mining Co., Spearfish, So. Dak. Gene is Forester (foreman in charge of a T.S.I. crew) for the U.S.F.S. at Sundance, Wyo.

HOWARD J. RUSSEL, JR. The Peavey wishes to correct an error made in last year's Peavey. Howie was Forester Bureau of Land Management (Medford, Oregon), in charge of approximately one-half million acres of forest land with an annual cut of 40 M.M. and not "Area Manager with the monumental task of overall management on 1½ million acres." Sorry, Howie—guess we got carried away. JAMES LINNE, '48, and JOHN AUSTBO, '52, are also employed by the B. of L. M. at Medford, Ore. Thanks for the very informative letter, Howie.

KENNETH W. SAHLIN reports, "Two children, a boy and a girl. Really like the Southwest and plan to stay in this country. Hope to take in the S.A.F. meeting in Milwaukee next October. Not too many Minn. fellows down here but there is room for some." Ken is Asst. Ranger on the Taos District, Carson National Forest at Taos, N. Mex.
it's here!

the new **HOMELITE**
MODEL 17 CHAIN SAW
the MIGHTY MITE of chain saws

only 22 pounds

*Cuts an 18 inch tree in 18 seconds*
This is it! . . . The most sensational saw ever developed . . . a really lightweight, high quality, low priced saw that's packed with fast-cutting power. Cuts an 18 inch tree in 18 seconds. Brings down trees 4 feet or more in diameter. Does every type of cutting . . . from production cutting to trimming orchards . . . and does it faster and easier.

Try it. Ask for a free demonstration. You'll be amazed when you see it in action.

**HOMELITE CORPORATION**
814 North Prior - St. Paul, Minn.

17-C
RALPH J. SWAN. Ralph writes, “I am still working with steel but have tried not to forget my wood technology training. My wife and children are fine and we all hope that we will be able to get away for a visit to the Twin Cities this summer.” Ralph is with the Benton Mfg. Co. in the Sales (Steel office Equip.) Dept. at Aurora, Ill.

MERLE WM. TELLEKSON keeps us up to date with “Still single and busy plugging away (Party Chief) getting the Washington. On the verge of completing the first run Minn.” Congratulations, Steve—is Wood Technologist in and steel towers—fire lookout towers, high tension electrical, and antenna towers. He wrote, “I still have no family—haven’t been in one place long enough to acquire one. I’m sold on the South and intend to stay here. The front door is open and beer in the ice box for any of the old gang that’s passing through.

STEVE H. WISE sends us, “Was separated from active duty (Army Field Artillery) in December, ’53. In July we purchased a ranch-style home on an 80-acre tract of land which borders the Experimental Station on its westernmost boundary. We now have 3 acres of ever-bearing strawberries but these will soon give way to pine and spruce reforestation. We have 3,000 seedlings ordered for this spring planting and by then we will be an active member in the ‘American Tree Farm, Inc.’ On December 17th our family was increased by Linda Jean, which is our second daughter. Kathie, our oldest daughter, is two years old.” Congratulations, Steve! Steve is Wood Technologist in Physics Section for the Wood Conversion Co. at Cloquet, Minn.

1951

HAROLD W. BENSON. Harry is serving with the U. S. Navy as a Communications Officer and Assistant Navigator on the destroyer, USS Frank Knox. At last report, he was returning from sea duty in the Far East (Japan-Korea) and planned to be home on leave sometime this spring. Hurry home, Harry—the “Merc” is waiting.

STANLEY E. BLINKS is Asst. Inventory Forester for Weyerhaeuser Tbr. Co. at Longview, Wash. He writes, “Am gaining lots of valuable experience in larger tree farm management (500,000 acres) in and around southwest Washington. On the verge of completing the first run inventory on the timber through the use of a light sample, aerial photos, and old maps. Very interesting work. Am also working on actual economic thinning of 60-year-old and under D-fir stands plus spacing work on reproduction. Fire duty is mandatory in the summer. A periodic old growth condition class recon. for logging map (a township at a time) is also included. At present, Weyerhaeuser’s Longview Branch employs 12 foresters.”

PHILIP F. CORSON sends us, “After my release from active duty with 30th Engr. Topo. Bn., I returned to the U.S.F.S. here at Quincy. Bill Howard, ‘51, and John Fronj ‘50, are here on the Plumas. By the time the Peavey goes to press, my wife and I will have an addition to our family.” Congratulations, Phil—we went to press the 15th of March. Phil is Engineering Aide for the U.S.F.S. on the Plumas National Forest at Quincy, Calif.

ROBERT R. DELAMARTRE is Forester for the U.S.F.S. at Rexford, Montana. He reports, “I’m still on the Kootenai although I was detailed to the BE and PG for 6 months last summer. Part of my job with that outfit consisted of coordinating the work of 3 crews surveying for spruce beetle infestations on the “Flathead” forest and part of the Lolo. Also worked on the Clearwater and St. Joe. During my travels last summer, I saw Bill Howard, ‘51, Bob Nixon, ‘53, Del Radtke, ‘53, Phil Heyn, ‘52, Joe Sterle, ‘52, Virg Findeell, ‘51, and Bob Feilzer, ‘53. Findeell and Feilzer are both on the Kootenai. Dean Reed, ‘53, was also on the Flathead last year. At present I’m still single although I expect that situation to change within the year.”

EDWARD G. FLEMING. Ed is Salesman for the Havre Builders Supply Co., Inc., at Havre, Montana.

ROBERT D. GARNER can be reached c/o Engineer Officer, V. A. Hospital, Murfreesboro, Tenn.

ED HASLERUD is Forester I for the IR & R at Bemidji, Minn.

GORDON T. JOHNSON writes, “I transferred to the Unaka District of the Cherokee National Forest in August of 1953. It took me a little while to get my lungs and legs in shape for mountain climbing after working in the Coastal Plains area for fourteen months. The major part of my time is spent in timber marking. The southern Appalachians have a large number of commercial tree species. It is quite a task learning all the hardwoods and conifers in this area. The country is very beautiful around here and my wife (Joyce Fischer—Home Ec. ’51), and I have a good time sight-seeing on weekends along the Blue Ridge Parkway and also visiting the Great Smoky Mountain National Park vicinity.” Gordy is Asst. District Ranger for the U.S.F.S.

ROBERT E. LINDE is Research Chemist for the Central Research Dept., Crown Zellerbach Corp., Camas, Wash.

ALLEN L. LUNDBERG has returned to the U. of Minn. to work for a Master’s degree. He resigned from the U.S.F.S. last July, 1953, where he was Asst. Ranger, Silver City District, Gila National Forest. The Lundgrens were blessed with a girl, Karen Lenore, born April 3, 1953. Congratulations, Ali.

L. J. McDONOUGH is Inter-Plant Coordinator for the Chris-Craft Corp. at Algonac, Mich. He reports, “No family, still a bachelor, but looking hard. Have a swell apartment on the river but no boat as yet. Enjoy my work very much. Much of my work has to do with quality control throughout the organization.”

WILLIAM MIKE brings us up-to-date with “Inducted into the Army October, 1951. Was married July 5, 1952. Was discharged from the Army in September, ’53. Have been working with Western Electric Co. since November, ’53, as an Inspector of poles and miscellaneous equipment.”

DONALD W. PETERSON. Don reports, “I was transferred last May from Park Falls, Wis., where I worked on the Survey Project. I took the place of Don Roder, ’51, here at Bergland, Mich. (as Asst. Ranger). Am still fancy free—no wife, no kids. My work here has been largely timber sale administration.”

DONALD PRIELIPP is Forest Pathologist for the Wm. Bonitas Lbr. Co. at Iron Mountain, Mich.

KERN RIDLINGTON was married the past December 18 to Dorothy Helen Olson. Congratulations, Kern.

DONALD C. RODER writes, “I received a transfer from the Ottawa National Forest in Michigan to the Mt. Hood
LOGGING TODAY IS DIFFERENT

Perhaps the best-recognized symbol of modern logging techniques is the power chain saw. Yet, it is only one of many significant changes which have characterized the progress of the logging industry during the past decade. In pulpwood production, for example, the advent of tree-length skidding, skidding arches, small crawler tractors, hydraulic skid-loaders, truck-mounted hoists, and pulpwood cranes have virtually revolutionized the industry.

One factor in this development has been the sterling efforts of individual working loggers to improve their own methods and machines. Another has been the increasing prominence of technically trained logging engineers. These men have been effective individually, and also through well-coordinated mechanization programs of forest industry associations. A third factor has been the willingness of equipment manufacturers to invest in purely experimental machinery.

The progress of the logging industry is reflected not only in more efficient production methods and machines but in higher earnings and better working conditions for woods workers. Skilled men with families, living in forest communities, are replacing the legendary lumberjacks in the large camps of bygone days.

Logging today is different, and with the continuing efforts of the logger, logging engineer, equipment manufacturer, and the forest products industry, even greater advancements can be expected in the future.

The Northwest Paper Company

Minnesota

Northwest Pedigreed Papers Always Make Good Printing Better
Minn. fellows out on this forest that I have run into. They are DICK BURKE, '52, ORV WITHEE, '40, and LOUIE NICHOLSON, '33." Don is Timber Sales Officer, Bear Spring Ranger Station, Mt. Hood National Forest.

LAWRENCE E. SMITH is an Inspector for the Western Electric Co. at Portland, Oregon.

CARL STOLTENBERG, Asst. Prof. of Forest Economics, School of Forestry, Duke University, Durham, N. C. He worked with the N. E. Forest Exp. Sta. the past summer on an interesting research project and he plans to be back up there this summer. JOHN McGuire, '39, was working with Carl on the project. Carl says, "Academic duties and research activities at Duke continue to be very interesting. Developments at home include the arrival of Susan Irene in December, '53." Congratulations, Carl.

PAUL A. SUNDIN. Paul is Field Asst. with the International Paper Co. at Gilmer, Tex. Will check up on the "slip-up" on lost year's Peavey, Paul.

KENNETH G. TORGERSON is Forester with the North Star Timber Co. at Duluth, Minn.

JACK C. TUCKER reports, "I'm learning a bit about the logging end of forestry and enjoying life in Duluth with my wife and son." Jack is Forester for the Oliver Iron Mining Division, U. S. Steel, Dept. of Timberslands.

DAVID P. WELLS has been in the Timber Dept. of Paragon Plywood at Crescent City, Calif., for the past year and a half. The Wells bought a redwood flat-top home and at present have two daughters—2 years and 7 months. Congratulations on the new arrival, Dave, and hope that you make it back to Minnesota this year.

1952

GERALD W. ANDERSON writes, "I am employed (as Forester) by the U.S.F.S. on the Rigdon District of the Willamette National Forest. I am getting experience in sales administration and pre-sale layout. My wife works in the office of a local lumber company. We spent the holidays visiting in Minnesota and I made the rounds of Green Hall and met the gang again. SAM POIRIER, '37, works on the "slip-up" on last year's Peavey, Paul." (Ed. note—oh, come now, John.) Recently sat in on a ranger meeting for the Chequamegon National Forest at which I saw LEO ANDERSON, '49, CLIFF CROSBY, '53, and NORMAN NELSON, '35. DICk MUNDINGER, '52, and KEN YSTESUND, '54, have both managed to obtain visas for themselves and their families in order to visit us over here in God's Country. As for planting stock, the nursery is flourishing with the 2-0 stock doing nicely and a new crop expected in the seed bed in May.

PERRY R. HAGENSTEIN is enjoying Army life. He reports, "Now serving my tour of duty with the Army. Attending Army Language School at the Presidio, Monterey, California. Winter weather here is quite enjoyable and there are plenty of golf courses.

JAMES W. HAUAN Jim's mother reports that he is now serving with the Army. Thank you, Mrs. Hauan.

ARTHUR A. HENDERSON. Our thanks to Art's dad who reports that Art is at present based at Buena Vista, Box 151, Virginia, as a Ranger with the Park Service.

JOHN K. HILLMAN is a Lt. with the U. S. Army and wrote us, "Am presently enjoying myself in 'Frozen Chosen (Korea) the 'Garden Spot of the World' where the magnolias bloom the year around, the waves beat upon the scenic shoreline, and the sun shines daily. My buckets of spare time are spent enjoying the wondrous and awe-inspiring sights to be found only in this fair land of milk and honey buckets." (Ed. note: That sounds almost as nice as Okinawa in the springtime.)

DENNIS J. JOHNSON writes from Elgin, Illinois, "We enjoy Elgin very much. Our little boy is now a year old and is really getting into trouble. We expect him to be a fullback at Minn. in 1970." Denny is Purchasing Agent for Shurtleff and Co.

KENNETH J. JOHNSON, Ken is still inspecting timber on some electrical equipment for the Bell System as an Inspector for Western Electric Co. He says, "no additions to the family as yet."

ALLEN A. PRIGGE is Timber Management Asst. at the Union Creek Ranger Station, Prospect, Oregon. He notes, "DOUG SHAW, '52, is at this station and you'll no doubt get the news from him. I made it back to Minnesota during the holidays but found it rather hard to live with all of these Oregon State men after their basketball team beat Indiana."

DENNIS A. RAPP at last report is a Lt. with the 2005th A.A.C.S. Sqdn., A.P.O. 12, New York, N. Y.

BERNARD J. SCHAEFER. Our thanks to Bernie’s dad who informs us that “Ben is now stationed in Germany with the 63rd Tank Bn. and expects to return to the States in July, ’54, and he will be discharged from the Army in August, ’54.

DONALD C. SCHIEGE. Don is Forest Ranger at Antigo, Wis. He writes, “I am a ranger working out of station in Antigo which is District Hq. My wife (grad. of U. of Minn., ’52—Home E.) is teaching Home Economics in Birnamwood High School, Birnamwood, Wis.”

CALVIN L. SMITH is Timber Cruiser for the Kosmos Division, U. S. Plywood Corp. at Kosmos, Wash.

JOSEPH R. STERLE wrote, “Worked 8 months (as Asst. Forester) for the J. Neil’s Lbr. Co. in Libby, Montana. Then transferred to their operation in Glenwood, Wash. May be here quite a while. Would appreciate a visit or word from former classmates, with an eye to returning same. Wife and daughter doing fine; expecting an addition to the family in June.”

GILBERT THOMPSON is Methods Engineer for the Hamilton Mfg. Co. at Two Rivers, Wis.

DAROLD D. WESTERBERG checks in with “Forester I with the Forest Survey staff for IRR & R. Have been employed here (Hibbing) since April, ’52.”

1953

ROBERT J. ARKINS sent the following communiqué, “Pvt. U.S. 55410062 is now serving Uncle Sam in the 11th Airborne Division at Fort Campbell, Ky.” A later report states that Bob is now taking his “jump-training” at Ft. Benning and will return to Ft. Campbell after training. Geronimo!

DONALD W. BUTLER completed a ten-week course in wood technology and utilization at the Washington, D. C., laboratory of the Timber Engineering Co.—research affiliate of the NLMA. Don was one of four students chosen for these scholarships for the entire country. Don is now with the Lampland Lbr. Co. in St. Paul.

DAVID S. CROSS is spending the present time with the U. S. Army. Dave and BILL MAGNUSON, ’53, are going to ten weeks of Intelligence School and expect to see overseas duty shortly. Dave spent the last summer on the Trinity National Forest in northern California. He was foreman of a 3-man fire crew and had charge of the guard stations; although they had quite a few fires, they were lucky and had no very large fires. Dave’s wife had quite a time adjusting to tent life but finally did.

ELGIN E. FILKINS writes, “Haven’t found a class of people in a section of the country that I didn’t like.” Elgin is Junior Forester for the U.S.F.S. at Blue Ridge, Ga.

GORDON W. GILBERT is associated with Trees for Tomorrow, Inc., as Asst. to the Camp Director, John McLean, during the High School Workshops.

LANSIN HAMILTON reports, “There are still three of us although we are expecting an addition in April (a forester? this time?) I am working with RUSS LUKKARILA, ’50, on the inventory of Koochiching County ownership. The field work should be completed by fall. Like it pretty well although getting a little tired looking at aspen all the time. Was very lucky deer hunting last fall and was in the right spot four times; however, as a group we fell two short of filling out.” Lansin is Forester I with the IRR & R at Northome, Minn.

RUSSELL E. HANSON is with the Army at Ft. Bliss, Texas.

WILLIAM R. MAGNUSON is with the Army at Ft. Riley, Kansas.

DON MINORE is continuing his schooling as a Research Asst. in Forest Path. at the U. of Wis. He writes, “Temporarily fiddling around with Oak Wilt. I do not have a family but am now the sole surviving member of W.H.O.A.”

EUGENE E. MURPHY, Ensign, U.S.N., fills us in with “Called to active duty as soon as I finished school. Got married and was shipped to Sasebo, Japan. Work in communications over here and am counting the days ‘till I’m back in the toil timber. Should be back in the States about October, ’55.”

LEWIS A. NICHOLSON is a Junior Forester, Lakes District R.S., Estacada, Oregon. He reports, “Oregon is great but it can’t beat Minnesota.”

ROBERT J. NIXON writes, “Since leaving school, I have been working for the U.S.F.S. on the Clearwater National Forest—mostly on timber sales. Still am single.” Bob is Forester at Pierce, Idaho.

CHARLES E. OLSON, JR. Chuck is an Ensign, U.S.N.R. at the Naval Air Training Center, Jacksonville, Florida. It is reported that he will take the Photo-Intelligence training program offered by the Navy. Chuck married a Miss Constance B. Kay last June 27, 1953. Congrats, Chuck.

ROBERT A. PERSKE sends us “Arrived on the Siskiyou Forest last June. Like the work and think the country is great. Saw DOUG SHAW, ’53, LOU NICHOLSON, ’53, and J. SCHROM, ’52, in Portland at the Junior Foresters Orientation. Started out as Timber Management Asst. doing lots of timber sales lay-out work. Was made District Asst. Ranger in December. Had a light fire season last year with only 8 fires. Hope this year is light.” So do we, Bob.

DAVID Y. ROSDAHL notes, “I am enjoying the job here. Everything is so different that I am learning continuously. I cannot understand why there aren’t more U. of Minn. graduates down here where there is so much opportunity in the forestry field.” Dave is Junior Forester with the U.S.F.S. at Crawfordville, Florida.

DOUGLAS S. SHAW. Doug was at the SW Forest and Range Experiment Station in Albuquerque, N. M., for six weeks last summer. He received his appointment to R6 on the Rogue River National Forest last July 27. The annual cut for the forest is 103 million fbm and his district has a cut of 50 million fbm. Since Doug’s arrival, he has fought fires, planted trees, computed volumes, made appraisals, cruised, graded, scaled, made clear-cut lay-outs, pruned trees, and collected seeds (from the poor squirrels, no less). AL PRIGGE, ’52, is stationed there also. The Shawes were blessed with a daughter, Sandra Ruth, on September 3, 1953. Congratulations, Doug.

HOWARD W. VENNERS sends us a K.P. report from the Army with “Feeling fine and keeping away from K.P. as much as possible.” Howie was home on furlough last January and informed us that he would have the “pleasure” of going back for eight more weeks of basic.

Acknowledgment

The 1954 Gopher Peavey staff sincerely wishes to thank all those persons who have helped make this year's issue possible. Friendly advice and hard workers are always appreciated on a project such as this.

Don Duncan, our faculty adviser, was always ready with a willing hand and did an excellent job on the 50th Anniversary. Dr. Kaufert and R. M. Brown contributed articles that will certainly interest everyone. Secretaries Lois Wieseke and Alice Becker came through to help in much of the typing and usually had the answers to many perplexing problems.

A special thanks should be extended to Kenny Winsness who so ably handled the Alumni News Section and as would be expected did a very fine job. Al Lundgren also contributed favorably in his synopsis of the Graduate Student News.

The cooperation of these people, the alumni, and advertisers have helped tremendously in making this Peavey what it is.

May we thank them all again.
